A New SYSTEME

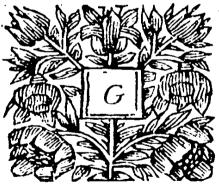

O F

Geography.

The Elements and Principles of Geography.

CHAP. I.

Of the Nature and Division of Geography.

EOGRAPHY is a Science shewing the Divisions and Distinctions of the Earthly Globe, as it is a Spherical Body, Composed of Earth and Water, for that both these do together, make one Globe.

2. And hence the Parts of Geography

are two, the one concerns the Earthy, and the o-ther the Watry part.

3. The Earthy part of the Globe may be divided into Continents and Islands.

 \mathbf{R}

4: A

of Geography. 3. Fretum or Strait, Is a part of the Ocean, strait-

ned between some Narrow bounds, and opening the Way to some Sea, as the Straits of Gibralter, the

Straits of Mogelan, &c.

4. Simo Is a Gulf or Bay or any Indraught of Water as the Gulf of Venice, the Gulf of Mexico, the Bay of Bifeara, and the Bay of Bengale in the E.Il-Indies.

5. Lucus or a Lake, is a Body or Collection of Waters, which hath no visible Intercourse with the Sea, or Influx into it, as the Lake of Geneva, and the Lake of Apphaltites, or Dead Sea, in the Land of Canaan.

6. Fluvius or River, is a Water-course Issuing from some Spring or Lake. - And Emptyeth it felt into some part of the Sea, a great River, as the Rhine, the Thames, &c.

4. A Continent is a great quantity of Land, not Separated by any Sea, from the rest of the World; as the whole Continent of Europe, Afia and Africa.

5. An Island is a part of Land Environed with fome Sea or other, as the Islands of Great-Britain, and Ireland, with the Ocean: The Island of

Sicilia with the Mediterranear.

5. Both those are Subdivided into Peninsula,

Ifthmus, Promontorium. 7. Peninfula is a Tract of Land which being al-

most Encompassed round by Water, is joined with

fome little part or neck of Land.

8. Ifilmus is that narrow neck of Land which joineth the Peninfula to the Continent, thus is Africa joined to zlfix, only by that finall neck of Land that is Contained between the Mediterranean, and the Arabian Gulf; called the Red Sea.

9. Promintorium is a high Mountain which sho deth it felf into the Sea, the utmost end thereof is called a Cape, as Cape Bona E perance in A-

frici.

10. The Watery part of the Globe is Destinguithed by Divers Names, as Oceanus, Mare, Fretum, Sinus, Lacib and Fiveus.

1. Oceanies, or Ocean, is that Great general Collection of Waters that Encompaffeth the Earth on

every fide.

2. Marc, the Sea, is a part of the Main Ocean, to which we cannot come but through some Fretum or Strait, as Mare Meditterrenerm, and fometimes takes its Name from the Adjacent Shore; as Mare Aderaticum, from the City of Alera, or from a first Diffeoverer, as Mare Migelanicum. 3.Fretum CHAP. II.

Of the Circles of the Sphere.

Here are ten Circles of the Sphere, fix great:

The Six great Circles, are the Meridian, the Horizon, the Equinoctial, the Ecliptick, the two Colures, all which divide the Sphere into two Equal parts.

The four lesser Circles are the two Tropiques, and the two Polar Circles, each of which Divides the

Sphere into two unequal parts.

B 3

The

The Meridian is a great Circle which passeth through both the Poles of the World, and through the Zenith and Nadir Points, and sheweth the Latitudes of all places on the Earth.

The Horizonis also a great Circle which divideth the visible part of the Heavens, which we see, from

those we see not.

The Equinoctial is a great Circle 90 Degrees from either Pole, in which Circle are reckoned te Longitude of all places on the Earth, from any certain Meridian Affigued, which Primary Meridian (from whence the Longitude of places in all t: Mapps in this Treatife, doth Commence,) is that which passeth through the Island of Pico Tenerisfa. and from thence Reckoned Eastward round the World.

The Ecliptique is a great Circle divided by the Equinoctial into two Equal Parts, one declining towards the North, and the other towards the South, the greatest Obliquity being 23 Degrees, 30 Mi-

nutes.

The Colures are two great Circles of the Sphere Intersecting each other at Right Angles in the Poles of the World. One is called the Solfitial, the other the Equinoctial Colure: The Solstitial Colure is that which passeth through the Poles of the World, and cutterh the Ecliptique in the Points of Cincer, and Capricorne.

The Equinoctial Colure passeth through the Poles of the World, and cutteth the Ecliptique, and the Equator in the Points of Arres and Libra, by which Points the four Seafons of the Year are Di-

Hinguished.

The

The Four Leffer Circles of the Sphere.

The four lesser Circles of the Sphere are the two Tropiques and the two Polar Circles, which Circles Divides the Earth into five broad Spaces called Zones, which are distinguished in the following Chapter.

CHAP. III.

Of the Division of the Earth by Zonesa

Zone is a broad Space of the Earth limited by the Tropiques, and the Polar Circles, and are five in Number, one Torrid (or burning Zone) two Temp erate, and two Frozen Zones.

1. The Torrid or Burning Zone is, that Space of Earth and Sea Contained between the two Tro-

piques, and is 47 Degrees in Breadth.

2. The two Temperate Zones are that Space Contained between each Tropique, and the Polar Circles, one called the North, and the other the South Temperate Zone: And are each of them 43 Degrees in Breadth.

3. The two Frozen Zones are those Spaces Contained between each Polar Circle, and the

Poles of the world.

4. The Inhabitants of those Zones in Respect of the Diversity of their Noon Shadowess are Divided into three Kindes, Amphifeii, Heterofeii, and Perifcii.

B 3

5. Those

5. Those that inhabit in the Torrid Zone are called *Amphifeii*, became their Noon-shadows are Diversly case, sometimes towards the North, and sometimes towards the South, according to the Position of the Sun, when it is on the North or South side of their Zenith, or Vertical Point; and their Shadows are cast accordingly, viz. If the Sun be to the Northward, then their Shadow is cast to the Southward, and so on the Contrary.

6. Those Inhabitants that live in the Temperate Zones are called Heterofeii, because their Noon Shadows are cast but one way, and that either North or South; Those who live in the North Temperate Zone, their Noon Shadows are alwaies cast towards the North and those of the South Temperate Zone, their Noon Shadows are alwayes cast towards the South. As may be seen in the Anexed Mapp of the Zones.

7. Those who Inhabit in the Frozen Zones, are called *Perisci*, because their longest day is at least 24 hours in length, and therefore the Sun being Carried Circularly about them, their Shadows are also Carryed about them, in the same manner.

CHAPIV.

Of the Division of the Earth by Climates.

Climate is that Space of the Earth Contained between three Parrallels, the middle most whereof Divideth it into two Equal Parts, serving

for the setting out the Length and Shortness of the days in every Countrey: and for as much as there have been several ways used by the Ancients in Dividing the Climates, I shall at present Content my self with this only Division; by Reckoning the Difference of each Climate to be one Quarter of an hour, and so the Climates are 24 in Number; till you come to the Latitude of 66 Degrees, 31 Minutes, (taking up 48 Parrallels.) To which are added six Climates more, where you will find the days to be One, Two, Three, Four, Five and Six Months long at the very Pole it self, as you may plainly see in the Annexed Table; Where you may Note, that the greater the Latitudes are, the longer the days are.

A Table of Climates, From the Equinotical North and South to the Poles, wherein you may see in every Clime the length of
the day in Hours and Minutes; As for Example, in the Climate or Parrallel of 50 Deg.
33 Min. you will find the longest day to be 16
Hours, and 15 Minutes, and in the Margent you find what Inhabitants dwell in those
Climates viz. the Amphiscii, Heteroscii,
and the Periscii.

CHAP. V.

Of the Division of the Inhabitants of he Earth, Respecting their Site and Position, in Reference to One another.

He Inhabitants of the Earth are divided into the Perieci, Antaci, and Antipodes.

2. The Perioci are such as dwell in the same Parallel on the same side of the Equator, and opposite to us: These live in the same Zone, and the same Clime; and cast the same shade with us: These Enjoy our Portion of heat and cold, our Seasons of the year, our Increase of Days and Nights, and all things else of this kind; Saving hat our Hours are Opposite, their six in the Evening, sour six in the Morning, our Noon their Midnight.

Meridian, which makes our hours, and theirs the ame; but by being 51 Deg. 30 Min. on the other fide of the Equator, it happens that though we all agree in the Temperament of Zones, Number of Climes in Casting a Shadow to one fide only, and the like; Yet their Zone and Climate is Southern, their Shadow falls to the South Pole, their Winter is our Summer, our Spring their Au-

lumn.

4. The Antipodes are fuch as dwell Feet to Feet, and are in height of Opposition, and differ in all things; our Summer is their Winter, our Noon is their Midnight; we have the North Pole Elevated, they the South. This truth of the Antipodes was in former time Reckoned to Ridiculous and Impossible, that Virgilius Bishop of Salisburgh who writ a Treatife thereof, was Condemned of Herefy by Pope Zachary, in the year of our Lord, 745.

CHAP. VI.

Containing several Oseful Distinctions in Geography.

He Latitude of a place is its nearest distance from the Equator, either to the Northward, or Southward thereof, measured in the Meridian.

2. The Longitude of a place is the Number of Degrees, (Reckoned Eastwardly in the Equator,) North and by East. from the Grand Meridian to the Meridian of the East and by North. place required.

And here Note that in all the Mapps in this South and by East. Treatife, the Longitude beginners at the Meridian South and by West. of Pico Tenariffa.

Zenith, is a Point in the Heavens that is Right West and by North. over our heads, and is fometimes called the Verti- Northand by West. cal Point, and Pole of the Horrizon.

it, right under our Feet.

Of the 32 Points of the Marriners Compass, which are thus Divided.

The four first, are the Cardinal Points, and are Composed of one Syllable, as East, West, North, South.

The Four Seconds are Colateral Points, Confifting of two Syllables, as North East, North West, South Eaft, South West.

The Eight Thirds are, those that are Composed of Three Syllables, as North North Eaft, North North West, South South East, South South West, East North East, East South East, West North West, West South West.

There are Sixteen Inferiour Points, Eight of them are Composed of four Syllables, and the other Eight of five Syllables: Those of four Syllables, are these that follow.

Thefe are Composed of four Syllables.

Ealt and by South. IWest and by South.

These are Composed of Five Syllables.

North East and by North. North East and by East. South East and by East. South East and by South. South West & by South. South West and by West. North West and by West. North West & by North.

Nadir, is a Point in the Heavens, Opposite to The Figure of the Marriners Compass is here Annexed.

11

Of Measures.

Twelve Inches makes a Foot.

One Foot and a half, one Cubit.

Two Foot and a half, a Common Pace.

Two Common Paces, one Geometrical Pace.

Three Foot one Yard.

Six Foot one Fathom.

Sixteen Foot and a half, one Pole or Perch.

Forty Perches makes one Furlong.

Eight Furlongs, or 320 Perches, make one English Mile.

to an Italian Mile.

1250 Geometrical Paces is one English Mile.

60 English Miles hath Vulgarly been accounted one Degree on the Earth, but really and truly, (As hath appeared by very Worthy Experiments,) that 69 Miles and a half of our Statute Miles, makes one Degree on the Earth: But according to the Vulgar Measure, the Compass of the Globe of the Earth, is 21600 Miles, and the Diameter thereof, is 6875 Miles, and 4528 parts; which Diameter being Multiplyed by the Circumference, gives the quantity of Miles in the Superficies of the Earth and Water, And the Superficies being Multiplyed by to of the Diameter, gives the Solidity in English Miles.

1500 Geo-

2500 Geometrical Paces make one Scotch

of Geography.

2500 Geometrical Paces make one Common

French League.

Geometrical Paces makes a Spanish 3400 League.

4000 Geometrical Paces makes a German

League.

5000 Geometrical Paces makes one Swedes or Swiffes League.

6000 Geometrical Paces makes one Hungarian

League.

CHAP. VII.

Eight Stades, or 1000 Geometrical Paces, is equal of the Use of the Mapps and Tables Contained in this Book.

> Hat which hath been already discoursed, hath been in the Nature of an Introduction; to ive you some Light and Understanding in the Principles and Elements of Geography: that Conernes the feveral Distinctions and Divisions of he Earthly Globe, by Circles, Zones and Climates; Discovering the various Positions of the Inhabitants, Respect of their Shadows, and Contrariety of easons, &c. Which may very well serve as a ood Introduction to that which follows.

Therefore take notice, that to each Mapp there a Table, that is as an Index to shew you what Dilions are in the Mapp, and is as it were an Ex-

planation

planation thereoff, which you will find very useful

for the understanding of them.

As for Example, In the Mapp of the World, the Table Informs you of the General Division of the World, which is thus worded, The Mapp of the World is divided into two Continents; The Continent of Europe, Asia and Africa.

The Continent of North-America, South-Ame-

rica.

Now if you cast your Eye upon the Mapp, you may there plainly perceive the same Divisions Circumscribed with one intire Colour with the Name in the midst thereof, in Remarkable Capital Letters.

Then if you defire to know how any of the Quarters are Divided; Pitch upon what Quarter you pleafe, (Suppose Europe;) Then Apply you felf to the Table, and there you will find the General Divisions of Europe into the Empires Kingdoms, Principalities and Dominions, &c. Contained in the same, with the Principal Cities in each Country; then turne to the Mapp, and you will see each Respective Division, Exactly Answer thereunters it is Exprest in the Table.

Now, if you would descend into the particular Divisions of any one of the Quarters, you must proceed in the same Order, as has been Directed; (Suppose it were Germany:) Therefore turn to the Table, and there sind into what parts Germany is Divided: as Meck lenburgh, Pameren, Brandenburgh, &c. with the Principal Cities contained therein; so that by the you may note the Excellency of this Contrivance for by these Divisions, appearing so plainly to the eye, that you may see how one Countrey border

upon another, so that by this View an Idea of the holeCountry(with all its Divisions) may be framed in your mind, that at any time you have the whole Prospect thereof drawn into your Imagination, and Understanding; and can thereby Conceive the Probability or Improbability of any matter, that may be discoursed of in those Countreys.

Now, if you would yet descend into the knowledge of any one particular Countrey, (or Subdivision in this or any other Empire or Kingdom that is Express n the General Table,) you are to proceed in the same order and manner as is before Directed.

CHAP. VIII.

Shewing the Use of a Mapp of the World that gives the hour of the day, (at any time,) in any part of the World; and to know where the People are Rising, where they are at Dinner, where at Supper, and where going to Bed; being an Opperation most Diverting and Pleasant, to be performed by a Map.

IT is in all Respects as other Mapps of the World, save only that this is Divided into 24 Meridialians, or hour, Circles-Numbred in the Equinoctial with I. II. III. IIII. V. VI. &c. to XXIIII. the hour Circle

Circle of XII. passing through the Zenith of London.

The Uses Follow.

To find the hour of the Day (at any time) in any

part of the World.

Having the Mapp before you, you may take notice that when it is Twelve a Clock at London, then wheresoever you cast your eye, it is the same hour at Every Place, as is Exprest in the Mapp, viz. It is one a Clock at Venice, Two a Clock at Constantinople, Three at Aleppo, and Four at Madagascar, &c. In the Eastern Hemisphere, and in the Western Hemisphere: Six a Clock at Jamai-

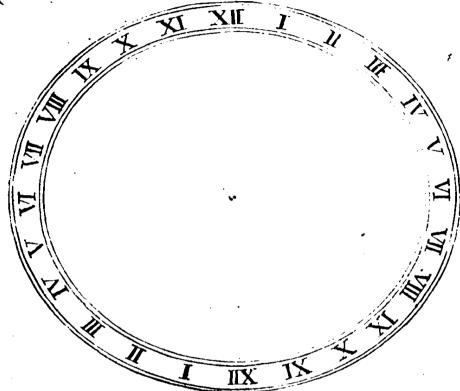

ca, Three a Clock at Califournia, &c.

But, Suppose it be any other hour with us at ready finding London, then for a more the hour in other places: I Refer you to this Adjoining Instrument, the Use of which may be made plain by one Example: As, Suppose it were Eleven a Clock at London, then turn London (on the moveable plate) to the hour of Eleven in the hour Circle, then will it shew at that very time the present hour, at all those places in the moveable Plate; it will be Twelve a Clock at Venice, One a Clock at Constantinople, and Two at Aleppo, ੴc.

So the same Rule will tell you, at any time, the hour of the Day in any part of the World: by turning London to the present hour there, and all the rest will fall successively, as in the foregoing

Example.

An Instrument for finding the hour of the Day (at all times) in any part of World.

An Example of the Ule of this Instrument

If it be a a Clock at London what hour is it. at any other part of the World, therfore turn London to g (the hour given) Then Shall of prosent hour be shewn at all those places Exprest in it Rundle; as you see it is 11 at Constantinople. & 12 at Aleppo Gc.

To know by the aforesaid Mapp, where the People are Rising, and where they are at Dinner, where at Supper, and where going to Bed; and where is Midnight in any part of the World.

This Problem is grounded upon this Hypothesis, that Six a Clock in the Morning may be taken for time of Rising, and Twelve a Clock for Dinner time, and Six a Clock in the Evening for Supper, and Ten a Clock at Night for time of going to Bed; and Twelve a Clock for Midnight.

Therefore Note, when it is Dinner time with us at London, then they are Rising at Jamaica, and at Supper at Surrat, and going to bed in the Phillipina Islands, (a little to the Eastward of China) and Midnight in the Pacifick Sea, and by the same Rule and Reason you may know the same things at any other hour at London. The forementioned Instrument doth most readily perform the same Operations by Noting what hour stands against any place in the Moveable Rundle; as suppose you turn London to Twelve a Clock, then you will find the hour of Rising, Supper time, of going to Bed, and Midnight, at the places before Mentioned.

There is also another Pleasant Operation to be performed by this Mapp, to know what company we have of Divers Nations to rise with us, to go to Dinner when we do, and to Sup and go to bed at the same time with us, that is to say, all those Inhabitants that dwell under our Meridian, or hour Circle, which are French, Spannards, Moores and Negroes, all which Nations Rise, Dine, Sup, and go

to hed, when we do.

CHAP. IX.

Giving the Content or Quantity of the whole World in Acres, and of every Kingdom and Province thereof.

He Globe of the World is supposed to be one third part water and Seas: And one third part not Inhabited; And one third part inhabited, which Containeth in Acres, as solloweth.

A

Geographical Description

OF THE

WORLD.

CHAP. I.

Of the World in General

He surfare of the Earth is Divided into two great Continents one of which is Divided into Europe, Asia and Ascica, and the other into two, viz. North and South America, as are plainly soen in the Mapp of the World, with their names in the midst in Capita! Letters: There is but little difficulty about the bounds after that which joyns Europe and Asia, is Considered (for bating the little Islbmus made by the Mediterranean and Mare Rubrum, which containes the Limits of Asia and Africa) there

rounded by the Sea: For the separation then or Boundary between Europe and Asia, Geographers are of various Opinions Concerning this Division: Some Divide it thus, with a line drawn through the Egean Sca and Helespont, through the Euxine Sea to Palus Meotis, along the stream of the River Tamans to the mouth thereof, and foby the River Dwina to the Bay of St. Nicholas in the white Sea.

Others (as the Right Honourable the Earl of Castlemain) in his Book of the use of the English Globe, doth more Judiciously divide it thus, Supposing a line drawn from the Mouth of Tanan Runs up the stream to Tuia (Scituated on the most Easterly flexure,) and thence going to the nearest Banks of the River Oby, accompanies it till it falls in the Northem Ocean, my Lord doth the rather Incline to this Division than any other, because it Containes almost all the Vast Dominions of the Russian Emperour, and so makes him an intire European Moarcha

CHAP. II.

Of Europe in General.

Trope although it be the least of the four grand Divisions of the Earth (as appears in the Mapp of the World) yet it is of the most Renowne. 1. For the Temperature of the Air, lying in the midst

is no part of the said Quarters which is not Sur- midst of the Temperate Zone, and therefore Fertile in its foil. 2. The flourishing of Arts and Sciences. 3. For the Purity and Sincerity of the Christian faith,

The language of the Europeans is Divided into feveral branches or Dialetts, but all from three Roots or stems, which are, 1. The Latine. 2. The Tutonick or High Dutch. 3. The Sclavonian tongue. Those that Branch from the Latine are the Italians, French, Spaniards, Portugalls; and those from the Tutonick, are the English, Dutch, Swedes, Danes, Gothes; and from the Sclavonian, the Croatians, Hungarians, Transilvanians, Russians,

The Kingdoms and Principal Regions are as followeth, (as they stand in the Table of Europe,) viz. England, Scotland, Ireland, Spain, Portugal, France, Italy, Germany, XV II Provinces, Norway, Sweden, Denmark. Poland, Lithuania, Moscovia Russia,

lesser Tartary, Turky in Europe.

The most famous Rivers in Europe are nine, The Thames in England, Tornia in Scandinaria, Wolga in Muscovia, the Loire in France, the Rhine in Germany, the Weysfel in Poland, Tagus in Spain, Po in Italy, and the Danube in Germany and Turkey in Europe.

We Rank England, Scotland and Ireland, in the first place, in Regard they owe obedience to the

Scepter of our Gracious Soveraign.

We shall therefore Begin with the Description of the Kingdoms of Great Britain and Ireland, (not affecting that Diminutive Appellation of the British Isles) as if they were Guernsey or Farley and no way Comporting with the Renown and Grandure of those famous Kingdomes.

Of Great Britain.

A Geographical Description

Reat Britain Containes England, Scotland, J and Wales, making the most Famous Island in the whole Worl. It was once called Albion, ab Albis Rupibus from the white Rocks apearing on the South Coast, towards France, from whence it was first Discovered. Afterwards Britain, some say from Brutus, of the Trojan Race, who first settled a Government here; or as others will have it, from Prutainia, fignifying Mettals, because of the great quantity of Tin, Iron, Lead, &c. that is found here. But others fay the Britaines had their name from the word, Brith, which fignifieth stained or painted, by reason of a Custome the Natives had to paint their Skins all over, and of feveral Colours, that they might thereby the more Terrify their Enemies, whence also the Romans called the People of Scotland Pists.

whole length from Strathy-head The in Scotland to the Lizard-point in Cornwall, is counted 624 Miles: And the breadth from the lands end in Cornwall, to the Isle of Thanet in Kent is about 340. It is observed in his Majesties Teritoryes about Great Britain and Ireland, there are eight Several Dialetts spoken by his Majesties own Subjects, viz. 1. English. 2. Scotch. 3. Irish. 4. Welch. 5. Cornish (in Cornwall.) 6. French (in Garnsey and Farsey.) 7. Manks (in the If of Man) and 8. Gothill (in the Islands of Suht-Jand.

Of England.

Ngland (a name taken from the Angli a penple that came in with the Saxons, and not chang'd by the Danish or Norman Conquerors) is the chief part of the Island of Great Britain, being Divided into 40 Countys and 22 Bishopricks, is Accounted in length 386 miles, in breadth 279. The foil is very fertile and plentifull; several of its Chief Commodities and Excellencies are Contained in this verse.

> Angliay, Mons, Pons, Fons. Ecclesia, Femina, Lana.

England is stor'd with Bridges, Hills and Wooll, With Churches, Wells, and Women Beautifull.

Its first known inhabitants were the Britains, who being Conquered by the Romans, and afterwards over-run by the Saxons, were forced to Retire into that Corner of the Kingdom called Wales: where their Posterity to this day Inhabite, being a Province Divided into 12 Countys and 4 Bishopricks, the eldest Son of our English Kings, being always Entituled Prince of Wales.

The forementioned Jamons Divided the whole Realm into seven Kingdoms, and were much oppressed for a long time by the Danes, but at lask last being united under one King, were subdued by the Normans, under William the Conqueror, whose Cotland is the Northern Part of Great Britain,

Of Wales.

Tales is Invironed on all fides by the Sea, except towards England, from which it is separated from the RIVER DEE, and a line drawn to the RIVER WYE: But Anciently it Extended to the RIVER SEVERNE Eastward, for Offa King of the Mercians, forced them to leave the Plain Countrys beyond that River (which now is called the Marches of Wales,) and to betake themfelves to the Mountaines; which he caused to be deparated from England, by a great Ditch called Offa's Dike, in Welch Claudh-Offa, in many places yet to be feen.

The whole Country is Generally Mountanous and Barren, yet affordeth feveral good Commodities, and is not without many fertile Valleys, which bear good Corn, and breedeth abundance of finall Cattle, with which they furnish England; as also with Butter, Cheefe, woolen Cloth, called Frieges Cottons,

Bays, Calveskins, Hides, Honey, Wax.

It is divided into 4 Circuits for the Admistration of Justice, and is divided into 13 Counties, wherein is contained 1016 Parish Churches, 56 Market Towns and 40 Castles, 230 Rivers, 99 Bridges, 32 Parks, 13 Forrests, 1 Chase. Also these hills are samous for their height, viz. Snowden, Plinillimon, Brechin, Moyluodian, Brethen, Caddoridrie, Rurduvaure, Monuch, Dennye, and Penman-Maur. Of

Of Scotland.

longer then England, but not fo broad, much kolder and less Fruitfull, the whole Containing 35 Shires, is Divided into Lowlands, which speak a kind of Barbarous English, and the High-lands, whose language is very neer the same with the Irish. This Realm, upon succession of King James to the English Crown, became united to that Scepter, and are Joyntly Itiled Great Britain. Its Chief Commodities are Course Clothes, Frieses, Fish, Hides, Lead-Ore, and here are four Universities, Edenbrugh, Glascom, St. Andrews, and Aberdeen, two Arch-Bishows and eleven Bishops.

As to their Courts of Justice, they are peculiar to themselves, the chief of which is the Session or Colledge of Justice, confishing of a President, 14 Senators, 7 of the Clergy and as many of the Laity, unto which was afterward joined the Chancellor, who is chief, and 5 other Senators, & in time of the Seffions of Parliament there is a high Commissioner constituted by his Majesty to Act as Vice Roy under him, which at present is the Illustrious Prince James Duke of York and Albany.

Of IRELAND.

T Reland is the bigest Island in Europe after Britain. The West of which lyes towards Spain, Containing in length above 300 Miles, in breadth 150. It neither breeds nor will Harbour venomous Creatures; the Soil is very good, and by the late Industry of the Inhabitants (now the greatest part English;) the whole Country begins to Grow rich and Flourishing, as the Populous and fair new buildings at Dublin, and and other Places, Demonstrate. It is Divided in four Provinces, viz. Leinster, Olster, Munster & Counaught and each of them into several Countyes, as may appear in the Table of Ireland.

The Comodities are store of Cattel, as also Tallows Butter, Cheese, and Wool, of which they make cloth Frieses, Ruggs, Mantles, &c. Its Seas yeilds great plenty of Codsish, Herrings, Pilchers, &c. and in the Bowels of the Earth, Mines of Tin, Lead, and Iron.

Of Spain.

C Pain, the most Western Country of Europe is separated from France on the Northeast by the Pyrenean Mountaines, and on the West joyning to Portugal, on all other parts washt by the Sea, its whole Circuit being 1900 English Miles. They are a mixt People, Descended from Gothes, Saracens, and Jewes: from the Jewes they Inherite Superstition, from the Saracens Melancholy, from the Gothes defire of Liberty. They are much given to Women, vain glorious, and stately; very Grave in their Carriage, zealous Adherers to the Church of Rome, Obedient to their Prince, true to their words, and of Wonderfull Patience, Enduring adverfity: their Women fober, loving to their Husbands, and Gallants, wonderful, Delicate, Curious in Painting, and perfuming, but by Custome forbidden to drink any VVine, at least till they are Marryed. This Country yields Sacks, Sugars, Oil, Metals, Liquorish, Rice, Silk, VVool, Corke, Rosin, Steel, O. ranges and Lemmons, and Raisins, Gc. But is defective in Corn, and are glad to be supplyed therewith from Italy, France or Sicilia; nor are their Cattle large or many, their fare being most upon Sallats

Sallats and Fruits; every Gentleman limitted what flesh he shall buy for himself and Family: they have Universities, such as they are: their Courts are kept at Madrid.

Of Portugal.

Portugal is a Distinct Kingdome by it self; though anciently a province of Spain. Its Chief City is Lisbon; their Customes and Religion much like the Spaniards.

Of France.

The Kingdom of France is for one intire thing, one of the most rich and absolute Monarchies of the World, being almost a square, each side containing about 600 Miles; it is bounded on the North with Lower Germany, on the North-West, washt with the British Ocean, on the west with the Aquitain Sea, on the South the Pyrenean Mountains sence it from Spain, on the East it extends to the Medeter anean, and the Alps, which Divide it from Italy. It abounds with all manner of good Fruits, besides great store of Fish and Fowl; but its Chiefest Commodities are Wine, Salt, Linnen, Cloth and Corn; the less Materials are Wood for dying.

dying, Paper, Nutts, Almonds, Laces to the New Modes. The People are general Complemental, inconstant and Rash; both their Gentlemen and Citizens live more sparingly then the English, they feed most on Boyl'd or Liquid Meats, and are very curious in sawces. In Matters of Warr, there is an old Comparison that Resembles the French to a Flea, quickly Skiping into a Country, and assoon leaping out of it; of which late Transactions afford several instances; their Language is Amorous, and they leave out manny Confonants in Pronuntiation, Occasioning this Proverb, A Frenchman writes not as he pronounces, Sings not as he Pricks, nor Speakes as he thinks. The Nationall Religion is Popery, yet there are many Protestants amongst them, whom they in derifion call Hugonors, who of late have bin and are under great Persecution for their Religion and loss of their Priviledges, not occasioned in the least by their disloyalty, or any disturbance of the Government, but only and alone from the Malice of the Popish Clergy. The Air in the Northern parts of France is Purer then that of England, and being not fo much Covered with Clouds drawn out of the Sea, becomes more cold in Winter, and more hot in Summer, and less Annoyed with mifts and Rain.

The Kingdom is divided into twelve General Governments, to which may be added four new Governments, being the late Conquests of the

French King.

Fourtowalds the North on this fide the Loir, four in the middle of France, on each side the Loir, four on the South beyond the Loir, and the other four tothe Eultward towards Germany.

Of several Countrys bordering upon France

A Franche Comte, or the free County, called also the County of Burgundy, is invironed with Champaigne, Lorrain, Breffy, and the Dutchy of Burgundy, being in length 90 Miles, and breadth 60. One of the most fertile Provinces in the World, the chief City is Besanson, the next Dole, samous for the Colledg of Jesuits there. It was under the Spinish Crown, but a few years agoe sudenly surprized by the French.

2. Lorrain, a Principality adjoyning to that last mentioned, about four days Journey in length, and three in breadth; it abounds with Corn and Wine, good Horses, plenty of Mines and Store of Salt and Fish: the Dukes Revenue was formerly computed at 700000 Crowns per Annum; and they were wont to give for their Device, An armed Arm coming as it were from Heaven, and Grasping a naked Sword, to shew that they were absolute Princes, holding theire estate by no other tenure then from God and the Sword: but the French have likewise not long fince violently over-run; this Countrey; and the present Duke Commands the Emperours forces, having Married the Queen Dowager of Paland.

C 2

3.Save*

Surgerland and Piedmont, which latter is for the most part under its Government, lying on the Italian side of the Alps, and being exceeding pleasant and Fruitfull. The rest of Savoy is Mountanous & Burren. Adjoyning hereunto, on the Lake Lemane, stands the City of Geneva, a Common wealth, not extending eight Leagues in Circuit; But of indifferent good Trade, and well Fortified.

4. Switzerland, is likewise a Republick, Consisting of 13. Shires or Cantons, of which five are all Papists, six all Protestants, and two mixt. The thought to be the highest Countrey in Europe, and sends forth sour of the Greatest Rivers. viz. The Danubias through Germany and Turkie East; the Rhine, through Germany, North; the Rhosne, through France, West; and so through Italy, South; the Soil is but mean, being so Hilly; but the Men great Warriours, and famous for their Mercinary Valour.

This Country is in length about 240 miles, and 188 in breadth, very Mountanous, affording Deers, VVild-Goats and Bears. The Valleys affords rich Pasture for Cattle, wherein consists their greatest wealth, in some places they stave good VVines and

Corn.

Of Italy.

I Taly is the most famous Region of Europe, very much Resembling the form of a mans legg; A most Pleasant Countrey, Commodious for Traffique, and Exceeding sertile.

Tis bounded on the East with the Adriatick Sea, South and West with the Tyrrhene Sea, on the North with the Alps, being in length 1020 Miles,

and in Breadth not above 440. in the Broadest

place.

It abounds with Corre, Wine and Oyl, yields plenty of Almonds, Pomegranats, &c. The whole

Countrey feeming as an intire Garden.

The People were Anciently famous for their Valour and Prudence, and are still Courteous and Grave, and very Obliging to Strangers, yet much Enclining to Jealousy and Wantonness, and sharp Revenge; sparing in Diet, but neat; their greatest

Expences are about their Gardens.

Here about 1600 year agoe the Latine tongue Florish'd, being vulgarly spoken; but afterwards by the Invasions of the Gother and Vandales, and other Barbarous Nations, the Common Speech became mixed and degenerated, which at this day we the Italian, and is still a most Delicate. Noble, Courtly Language.

The Capitall City is Rome, once kultris of the World in Temporalls, and still pictous to be an

in Spiritualle, in Compass about 11 Miles, but full of Gardens, and waste ground, so that its supposed not to Contain above 250000 Soules, two parts in three of whom are Clergy men, and Curtezans.

But in the Flourishing of the Roman Empire, it contained 50 Miles in Compass, and not Fewer then 3 or 4 Millions of People, as is found in

Authentick History.

After the Emperours removed their Seat to Constantinople, the Bishop of Rome taking Advantage by their absence, by pretended Donation from Constantine made himself absolute Prince of a great part of Italy, called St. Peters Patrimony, and the Lands of the Church, and the rest in time became Cantonized into severall Petty Principalities and States.

In the Bottom of the Adriatick, now called the Gulf of Venice, stands the famous City and Virgin Commonwealth of Venice, Situate on many Islands; and the water running through every freet, being in compass 8 Miles, Containing 70 Parishes, many Excellent Pullaces, and Curious Buildings.

Of the Principal Islands in the Me= diteranean Sea.

Of Sicilia.

It Is Island is the chiefest of all the others in the Mediterranean Sea, and is a Kingdom of it self, it is in Circuit about 780 Miles, it is

of a Triangular Shape.

It is very plentiful, and abundant in most things, especially Corn; it yields most Delicate Wines, sweet Oyl, Sugar, Honey, Silk, Sairon, great store of Salt, and by reason of the sweet Temperature they have all Sorts of Fruits, as also Mines of Gold, Silver, Iron and Allom: there are also found Emeraulds and Agates, and other Precious Stones; The Countrey breeds an Excellent Race of Horses; and amongst the Hills and Mountaines, there is the famous Mount Eina, now called Mount Gibello, although it lyes covered with Snow, jet from the topp Issues forth same and smoke, and sometimes casteth forth such a quantity of Ashes, that the fields are Covered therewith.

There are at present 12 Episcopall Cityes, the three whereof, as Palermo, Messina and Monwale, are Arch Bishopricks, all very rich; Palermo is the Royal feat of the whole Kingdome; The Sicilians are very Ingenious and sharpe witted People, Eloquent and Pleasant, desirous of Honour; the Island is under the Power of the King of Spain.

Of Sardinia.

He Island of Sardinia lyeth in the Mediterranean or Tyrrhenean Sea, whose Circuit is 560 Miles, it is Divided into two parts, one is more Hilly then the other; the Island produceth 40

Excellent Wines, and abundance of Cattell, and great store of Cheese; they have good Horses, but not very high: here are many hot Bathes, Salt pitts, Mines of Silver, Brimstone and Allom. This Island hath two Arch Bishopricks, the one is Cagliari, and is the chief City, Seated on a Mountain, having a fair Port; the other is Oristano, very meanly Inhabited by reason of a bad Ayre; is has a Port, and a great River. The Sardes are a Rude People, and uncivil, well able to endure Labour and hardness, good Hunters, not daynty in food, not Curious in Apparell. They formerly had a language of their own but, now Corrupted, and in the the Cities they speak Spanish.

Of Corfica.

His Island dath been Inhabited with divers Sorts of People, it is in length 120 Miles. It is Divided into two parts, the Easterne part is called the Inverior, and the other on the West called the Exterior fide; the Island is every where Encl fed with Rok Cifs, and within the land very Hill; it produceth Horses of a sierce Nature, and Hounds of a wood while Bi trefs.

Field this iffed was p slessed by the Tyrheans, and afferwards by the Child war was but they were driven out by the Robert printing whe also Expulfed by the Soration, within were skewife fill one ! by the C. G. and show favisdiction it re-C. Sinice

Of Malta.

His Island is renowned for the residence of the great Master of the Knights of Jerusalem. the Circuit is 60 Miles, the land is Stony without River in it; they have store of Sheep, Goats, Oxen. Asses, Mules, Coneyes and Partridges; the Inhabitants are very brown, fwarthy Colour, by reason of the heat of Summer; the Women are fair, but they hate Company and when they goe abroad they are Covered. Upon this Island was the Shipwrack of St. Paul, the chief town and feat of the Bishop is called Malta.

Of Corfu.

Orfu is one of the Islands in the Ionian Sea, in Circuit 300 Miles, and 40. in length; the South part Hilly, but the North part plain, one Mountain Excepted, which stands neer the Sea, on whose top is feated Castle Nova, underneath it Caftle Vector, and at the foot of the Hill lyes the C ty of Corfu, shut in and enclosed between those two differs; the Aire is very sweet and good; it ab ds with Cedar trees, Orange trees, and othe Femis; it is Plentifull in Honey, Wax, Wine and

and Oyl, Fish and wild Fowl, and wild Beasts, to the great pleasure and pastime of the Inhabitants in their Hunting and Hawking Recreations.

Of Candia.

His Island is one of the most famous in the Mediterranean Sea, it reaches 270 Miles in length, and 50 Miles in breadth. This Isle was ormerly called Crete, and had at that time 100 Cities; it is Hilly in the Easterne part: it abounds with O ive trees, Oranges, Cedars, and Excellent Wine, called Malmsey or Muscadine, and in their Valleyes Exceeding fair Pastures. This Island hath been lately famous for the great and eminent defence it made against the Turk, but at last was forc'd to yield the Conquest thereof to them, so the Vnersans lost it, after a long and tedious siege. The Cniefe City of the Island is called Candia.

Of Cyprus.

His Island, is 550 Miles in Circumference, in length it is 200, and in breadth 65 Miles. It is Divided into two parts by a Mountain which runs through it from East and West; the Ayre is very not, and but little water, there falls little raine; it abounds

bounds with all things needfull for life; it produeth great store of Corn, and other Pulse and Grain, Dyl, excellent Wine, Sugar, and Cotten-Wool, Honey, Turpentine, Verdigreace, Brass, and all Bort of Mettals, Salt and Grogrames of Goats hayre; the Women Lascivious.

This Kingdome is Divided into 11 Provinces, the Chief City is Nicofia, adorned with fair Churches and sumptuous Pallaces; it was once in the Poffession of the Venetians, but now under the Turk.

Of Majorca and Minorca.

Wo Islands about 60 miles from Spain, the first 300, the second is 150 Miles in Circuit, and both Indifferent Fruitfull.

Of Cephalonia and Zant

These Islands each of them are in Compass 60 Miles or there abouts, they have plenty of Currans and Oyl, and Wine; and are under the Venetians.

Of

of Europe.

The Title of the Father descends to all the Children, every Son of a Duke, is a Duke, every Daughter a Dutchess; For Religion, some are Papists, others Protestants; which latter are again divided into Lutherans and Calvinists.

Of Germany.

Ermany is Divided into two parts, High and Low. High Germany is bounded on the West, with France and Belgium; on the North, with Denmark and the Balinque Sea; on the East, with Pruffia, Poland, and Hungary; and on the South with the Alps and Italy. The Country is almost Square, each side being 650 Miles; it hath one General Governour called the Emperour, a Name derived from the Ancient Roman Emperours, but retains very little of that Power; for most of the other Princes are absolute in their Respective Dominions, whence this mighty Body, by Reason of Various Interests and Differences, becomes nothing so formidable as it would be, if firmly united under one Soveraign Monarch; The Principal Regions are presented to you in the Table of Germamy, the whole Country abounds withmost things necessary for Life.

Its Commodities are Mines of Silver, an other Inferiour Metals; Wines, and fresh Fish, Quick-Silver, Allom, &c. The People are Honest, Laborious, and Sincere, Stout Drinkers, and Good Souldiers: The Women of Indisferent Complexions, but somewhat corpulent; as for their Diet, There is this Proverb, The Germans have much meat, but Sluttishly drest; The French little, but neatly Cookt; The Spaniards neither one nor the

other.

Of the Seventeen Provinces.

Ower Germany is that which is called Belgium, or the Netherlands, and is bounded on the East, with the River Ems, and part of High Germany, on the West with the German Sea, on the North with East Freesland, and on the South with the Some, Champaign and Lorrain, containing in all Seventeen Provinces: But we shall only speak here of the seven United Provinces, or Dutch Common-Wealth; The Names of which are, Holland, Zealand, Verecht, Over-Issel, Zutphen, Groningen, and West-Friesland, which was first made in the year 1581. on their Revolt from their Ancient Soveraign the King of Spain, against whom by the great Assistance of the English, and Princes of Orange, they Waged War many years so successfully, that he was at last forced to treat with them as a Free State.

These Countries are exceeding Populous, being a People very Industrious, they have attempted to Grasp the Trade of this part of the World into their hands.

In these Provinces the Women govern all, both within doors, and without, and make all bargains, which

hath no larger Portion then the rest; they Marry

Noble with Ignoble, young with old, Mafter with Servants, and into strange Townes, and Forreign

There are within Holland also a great Number

of Lakes and standing Waters. They want both

Com, Wine, Oyl, Wood, Wool, Hemp, Flax,

and almost all other Commodities; and yet there is not any Countrey in the North which abounds

fo much as Holland and Zealand, in almostfall the

forementioned Commodities; fo great is the Ad-

vantages these Provinces receive by the Sea.

Countrys.

He ten Spanish Provinces are these, Flanders, Limburg, Luxenburg, Brahans, the Marquesate of the Holy Empire; Artois, Henault,

Namurs, Meckline, and Geiderland.

The Soil is very Fruitful, and mightily Peopled, but exceedingly wasted and impoverished by the .late Wars and Incursions made in their Country by the French King.

In these Countrys belonging to the King of 1 pain, are 208. Walled Townes, 150. Townes priviledged, as walled Townes; 5300. Villages

with

which makes them injurious and Troublesom; the with Parish Churches, besides a great Number of Eldest Daughter is of the greatest Reputation, yell Villages and Hamblets.

There are five principle Rivers in the seventeen Provinces; The Rhine, the Meuse, the Scheld, the

Haa, and Emes.

The Meuse affords abundance of Sturgeon, so big, that some of them weigh four hundred, and fome four hundred and twenty pounds, and are twelve foot long, of Antwerp Measure; The Scheld doth also abound with most forts of Fish.

They have divers Forrests and Woods, well stored, with Red and Fallow Deer, Goates, Wild Boares, Hares, Coneys, Badgers, Wolves, Foxes, &c. which yeild good Furrs.

The Fowl in these Countries are Partridges, Feafants, Turtle-Doves, Quailes, and any fort of Birds

as we have in England.

The two Principal Cities in these Countreys are Amsterdam in the Seven United Provinces, and

Antwerp in the Ten Provinces.

Amsterdam standeth upon the Gulf Tye, and is built upon Piles under the Ground, as Venice is ; fo that the buildings under ground, are more chargable then above: It is very rich in Merchandite, the buildings are very Sumptuous and Fair.

Antwerp lyes on the right fide of the Scheld, it flourisheth exceedingly in the Number of Inhabitants, in beautiful Buildings, and in Merchandizing, which is chiefly occasioned by the the Commodioutness of the Scheld, it being a River of so great bredth and depth, and Ebbing and Flowing fo far into the Sea.

Of Norway.

place very Barren and Mountainous, fo that instead of bread the People eat dried Fish, which we call Stock-fish. They export Furs, Train-Oyl, Timber, Deals, Clapboard. It is a Kingdom of it self, and divided into five Governments or Provinces.

1. The Government of Bahus, the chief Towns, Bahus and Maerstrand.

2. That of Agger, the chief Towns is Agger, Opflo; and Frederick Stade.

3. That of Bergen, the chief Town Bergen, the Residence of the Vice-Roy.

4. The Government of Bronthem, the chief Town Dronthem, the Seat of the Ancient Kings of Norman.

5. Wardbuyse, the chief Town Wardbuyse, near the North Cape of Norway.

The Normegians are little given to fickness, and are of a strong Constitution; their great inclination to Sorcery, makes them have the Reputation of selling the VVinds to the Seamen.

Of Sweden.

The Kingdom of Sweden hath on the East Muscovia, On the West the Dofriae-Hills (that part that side from Norway) on the North the Frozen Seas, and on the South the Baltick. The Country is little less then Italy and France put together. The People are good VVarriers, and live hardly, the Ayr is sharp but so salubrious, that it is ordinary for men to live 100 years; It aboundeth with Lead, Iron, Copper, Tarr, Furrs.

Sweden Comprehends seven parts, which are.

1. Halland, Schonen and Bicking, all which goe under the name of South Gothland. The Chief Towns Linden, Malmagen, Landskroon, and Chriflianstadt.

2. The North part of Gothland is divided into Oftro Gothland and Westro Gothland; The Chies TownsCalmar, Gottenburgh, and Linkopen.

3. Sweden containing eight or nine Provinces. The Chief Cities are Sweckholme, Upfal and Nikopen-

4. Lapland is Divided into five Regions or Territories, viz. Uma, Puba, Lula, Tormia and Lapmark with the Towns of the same name whereof Tormia is of most importance.

5. The great Province of Finland, Subdivided into several small Provinces, The Chief Towns are Abbo, Wiburg and Roseburg.

6. Ingria, The Chief Towns, Noteburg and Junisgrod. D

7. Livania, or Liffland, The Chief Town, Ri-

ga, Derpt, and Revel.

The Crown of Swedland is also possessed of several Islands in the Baltick Sea; And in Germany, the Dukedoms of Pomeren, Bremen and Ferden; The Town of Wilmar, and the Island of Rugen.

In the North Part of Sweden, Tormia and Kimi, are the most Considerable Rivers of Scandina-

via.

The Country is full of Mountains and Woods, The Commodities of the Country, are Copper, Buttet, Tallow, Hides, Skins, Pitch, Rofin, Timber and Boards.

There are fo few fick people among them, that Physitians and Apothecaries have little or no Pra-

Stice.

The Air is fo sharp and falubrious, that it is ordinary for men to live an hundred years. Their Religion Lutheran

Of Denmark.

Enmant Consists of three Parts, to wit, Jutaland, which is a great Peninsular or Chersonesis, annexed to Germany.

Jutland is Divided into North and South Jut-

land.

1. North Jutland includs four Lutheran Diocesses, which are,

1. The Dioceis of Rypen, 2, Of Arhusen. 3. Ot Wiburg

Wiburg, and Alburg, and Schagen, the North Cape of Denmark.

2. South-Jueland Comprehends two Dukedoms.

1. The Dukedom of Holftein, Included within the Circle of Lower Saxony.

2. The Dukedom of Slefwick, the Chief Town of the fame name, with the Castles of Gottorp, Tonningen and Fiendsburg.

The most Remarkable Islands of the Baltick

are.

1. Zeland, the Chief City Copenhagen the Refidence of the King, whose Brother Prince George was Marryed to the Illustrions Lady ANN, Daughter to his Royal Highness the DUKE of York, Anno 1683.

2. The Island Fuinen the Chief Towns Odensee,

Middlefort and Niburg.

The Islands and Countries in the Northern Sea, which depends upon the Kingdom of Denmark, are a great Island of Islandia, the Chief Town, Uola a Bishoprick.

The Islands Fego.

The Kingdom of Normay, Sc.

Of Poland.

The Elective Kingdom of Poland, lies to the Esstward of Germany, on the North of Hungary, Transilvania, and Moldavia, and South-west-ward from Muscovia.

It Contains two Estates, that of true Poland with D 2 the

the Provinces Annexed thereto, and the great Dutchy of Lithuania, with its Dependancies, which is now united to the Crown of Poland.

The whole Kingdom is divided into twelve Provinces as may appear in the Table. It is in Compass 2600 miles, very fruitful in Barley and Cattle, & Hemp Wax, Pitch & Tarr and other Merchandize. The Inhabitants Excellent Souldiers; They are all peftered with factions, that they can attempt no great matter, only to defend themselves from the Turks. They are much addicted to the Latine Tongue.

They have of all Religions amongst them, but the Present King seems much to favour Popery, and was Eminently fervice able in the late War in the relief of Vienna, and the regaining of Hungary from

the Turk.

Of Lithuania.

Ithumia is the Greatest Province of all those which Compose the Estates of the Crown of Poland; It has the Tittle of a Grand Dukedome, wherein there are as many great Officers, as in the Kingdome of Poland.

The Country is full of Mirshes and Sloughs, that

there is no travelling in the Winter for Ice.

Samogitia, a Countrey in this Dukdome, whole

Inhabitants live very poorely.

Vollinia, the Chief City Kiou, an Ancient place, having once 300 fair Churches, but destroyed by the Tarturs; still a Bishops See, acknowledging the Partriarch of Myco, and of the Communion of the GreekOf Europe.

Greek Church; feated on the Borysthenes, where the Coffacks have often had their Retreats. It was lately in the hands of the Muscovite', but now laid to be the Turks, in the year 1678.

In Podolia stands the well fortified and Impregnable Caminiack, which formerly withftood the Armyes of the Turkes, the leffer Tartars, the Transylvanians, and the Walachians; but at length was forced to yield to the Grand Seignior, in the year 1672. fince Retaken by the Poles; but by the last Treaty delivered to the Turks, as allo Organthew and Duffow, at the mouth of the Borysthenes.

Of Muscovia.

/ Ofcovia is the vaftest Empire in Europe , 3300 miles long, and 3000 broad: The whole Countrey is over spread with Woods and Lakes. The People for the most part fat and Corpulent, strong of Body, and good proportion, only Great Bellyes, and Broad Beards, are in Fashion. The Women love not their Husbands, unless they beat them.

They only teach their Children to Write and

Read. They wear long Robes, under which they have close coats down to their knees, but they tye their Girdles under their bellyes.

The

The Religion of the Australia is of the Greek Church; all their Images are in flat painting.

The Grand Duke bears the Title of Czar, as much as to fay Cezar. The Habits which he is faid to

wear makes him look like a Prieft.

The Embassadors of Forreign Princes are at the greatest trouble in the World to give him his right Titles.

One of his Pedeceffors was fo Barbarous, that he caused the Hat of a French Embassador to be nailed to his Head, because he refus'd to be uncovered in his presence: but Queen Elizabeth sent an Embassador thither foon after, a man fo Couragious, that he stood also in his presence covered, and undauntedly told the Czar to his Face; that if he touch'd a hair of his Head, his great Mistris would make his Empire to tremble; and made the Titles of his Mistris, the Queen of England, Exceed the number of the Czars Tittles; Stiling her The M ft high and Mighty Monorch: ELIZABETH Queen of England, France, and Ireland, Northumberland, Westmorland Cumberland, Tork-shire, Lancasterre, Cheshire, &c. Runing through all the Countyes and shires in England the length of which Titles Amazed the Czar; and he acquainted the Embassia dor, That he had a great Effects for her Majesty and for her Subjects; and declared his willingness to luffer her Subjects to trade in any part of his Empire, without paying any Dutyes, which great Priviledge was Continued to our English Merchants, until the Martyrdome of King CHARLES the first, of glorious Memory; he mightely refenting that Horrid Act; and that Priviledge hath not been yet regained, MuG

Muscovia is Divided into two parts, the Northern and the Southern: Mosco is the Capital City, and the Residence of the Czar.

of Europe.

There are at this present two Czars, who not long fince fent two Embassadors, one from each,

to his Majesty of Great Britain: 1683.

Of Turky in Europe.

Hat part of the Ottoman Empire which is Turky in Europe, Containes the greatest parts of Hungary, and all Transylvania, Moldavia, Bessarabie, Walachia, Bulgoria, Servia, Bosnia, Sclavonia, Albania, Romania, Macedonia, Theffaly, Epirus, Achaia, and Morea. with the Ægean and Jonian Mands, And in the year 1683 the Grand Segnior brought an Army of 100000 men in Anstria, where with he thought to have Conquered, not only the finall part of Hungary that is left to the Emperor, but the greatest part of the Empire also; The Conduct of which army was Committed to the Grand Visier, and past by all the strong Cityes in Hungary, as Raab, Komorra, &c. and fate down before Vienna the 8th of July in hepes to have taken it by Surprize.

The Imperial Army under the Conduct of the Dake of Lorrain, their General, very oppertunely Convey'd his Infancy into the City, confifting of 15000 men; who having Count Staremburg for

their

their Governour, a man famous for his Valour and and Conduct, that the great fury the Turks shewed in their feveral Affaults Redounded to their own lofs, and the encouragement of the Befieged; and were repulsed with a very great flaughter; some fay with no less then 15 cr 20000 men, whose dead Bodies proved fo great an Annoyance to the Turkish Army, that the Grand Visier defired three days Truce to bury his dead; which being denyed by the Worthy Governour, caused him to remove his Camp at a further distance, for fear of infecting his Army; and finding himself deceived in his Intelligence; (the Garrison being stronger than he was informed) he proceeded to a formal Siege, which he Continued for the space of nine Weeks; with more then ordinary Toyl and Labour, working with his Mines day and night, in hopes to have Carryed the place before any Relief could come to them; and having sprang several of them by which the place was Affaultable, he stormed it several times, but was still beaten off with great loss, and having at last sprung one under the Baston Lobel, he continued his Assault with greater fury and vigour, though without fuccess; so that after so long a time, and so many Continued Assaluts, the Governour finding himfelf reduced to great Extremity, made the Appointed Sign to the Duke of Lorraine for Relief: VVhereupon the King of Poland being joy ned with the Emperial Forces, made up an Army, of 85000 Men, Horse and Foot.

It was Resolved at a General Councel of Warr, to Attaque the Turkish Camp upon the 12th of September new stile; And Accordingly it was pu

in Execution. The King of Poland having the Attacked the Grand Visiers Quarters, The Duke of Lorraine on the fide of the Bastion of the Court; and Prince Waldeck that which leads to the Scotiffs gate. The Attaque being warmly begun, and Count Staremburgh Sallying out at the fame time, foon put the Infantity into diforder; upon with their Horses fled, and with them the Grand Visier, leaving them to the Mercy of the Christians, who cut them all to pieces, and remained Master of their Camp, with their Tents, the Pavilion of the Grand Visier, Their Artillery, and Ammunition, and a Considerable sum of Money; in this Action the English that were there, behaved themselves very Gallantly to the great Commendation of our Nation.

After the relief of Vienna, the two Armies under the King of Poland, and the Duke of Lorrain continued the Pursuit, and with great Success, and regained all the strong Holds in Hungary that were possessed by the Tarks; and in all this great Action the Turks did not Rally their Army to Face the Christians: But did Continually sly before them.

THE

THE

General Description

Of

SIA is a very Confiderable part of the World, in regard, First, That Man was therein Created; Secondly, Here our bleffed Saviour was born, wroughthis Miracles. and Suffered for the Redemption of the World; Thirdly, Here was Transacted the most Remarkable Occurences mentioned in the Old and New Testament, and from hence all Nations of the World, and all Arts and Sciences had their first beginning.

Many are the Religions here Followed; but the Jews, Mahomerans and Idolaters, excel the Christians in number.

Mahemetisme is received by the four Principal Nations of Asia, viz. the Turks, Arabians, Persians, and Tartars.

The Turks gives most Liberty, the Arabians

are the most Superstitions, the Persians most Rational, and the Tarrars most fimple.

The Turks follow the Doctrine of Omar and have

their Partriarch at Badgat.

The Perfians follow the Doctrine of Haly, and

have their Partriarch at Ispahan.

The Greeks also have their Partriarchs here. one Residing at Antioch, and the other at Jerufalem.

As to the Division of Asia from Europe, it bath already been discoursed of, in the Description of

Europe.

The Principal Seaswithin the Land are the Cafplan, the Euxine, and the Perfian Sea.

The Principal Rivers are the Euphrates, Tigris,

Indus, Ganges, Crocas, Kiang, &c.

The Air of Asia is almost every where Temperate, and abounds with Gold and Silver, Precious

Stones, Spices, and Silks.

Affix is in Subjection under four mighty Monarchs viz. The Grand Senior, the Sultan of Persia; the w Cham of Tartary (and now King of China) and the Great Megul.

A great part of Afia Confifts in a great multitude of Islands, of which are Maldives, Ceylon, Sumatra, Java, Borneo, Aynam, Japan, the Philippines, the Moluccaes, &c. And the Island of Cyprus, and Rhodes, and some others in the Mediterranean Sea.

Of

Of Turky in Asia.

He Turk by his Puissance having over-run a great share of two of the Considerable parts of the World; Possesseth in Asia, these Countreys Anatolia, Syria, Mesopotamia, Armenia, and

Georgia.

1. Anatolia vulgarly Natolia, and Anciently Asia the less, a Countrey once of great Fertility, but now wast and almost desolate, there were the seven Churches to whom St. John Directs his Book of the Revelation, as Ephesus, Smyrna, Pergamas, Sardis, &c.

Formerly the Air was Exceeding found and Healthfull, now every fix years the Pestilence de-

stroys Millions of People.

The Mahometan Religion is chiefly professed in

most places thereof.

Ephesus once famous for the Temple of Diana, of 425 foot in length, 220 in breadth, supported with 127 Marble Pillars, 70 foot high, 220 years in building, seven times fired.

Smirna, a place of great Plenty, the Soil abound-

ing with Wine and Oyl.

The heats are very Excessive in Summer, (and would be unsupportable, were it not for the Breezes that come off the Sea about 10 a clock, and continues till evening,) and is followed with the Pestilence and Malignant Fevers.

Pergamus and Sardis, have been Royall Cities, Pergamus is famous for the wealth of Attalus, for the Invention of Parchment, and the Birth place of Galen, for its Tapestry, and for its being one of the seven Churches.

Sardis for the Residence of the Kings of Lydia,

and also one of the 7 Churches.

The most Renowned Mountaines of the lesser: Asia are Taurus, which divides Asia into two parts, and is the most famous Mountain in the World for its height and length.

Euphrates divides Armenia and Mesopotamia

from Asia Minor, Syria, and Arabia.

Tygris, descends from the Georgian Mountaines sails into divers lakes, loses it self divers times in the Earth cutts through the Mountaines and divides Mesopotamia from Assyria, washes the Ruines of Ninevelo, receives the branches of the Euphrates, and disembogues it self into the Persian Gulf.

Syria, and Phenicia, Two Adjoining Provinces wherein is Mount Libanus, famous in Scripture for goodly Cedars: The Chief Cities Damascus, Antioch, Tyre, and Sidon, and those now more renowned for Commerce are Aleppo and Scandario ne. The Country abounds with Wheat, Oyl, Ealm, &c.

Canaan or Palestine, in length but 200 miles, and in breadth not above 50; yet so Fruitful that we read in Holy writ, it cace sustained 1300000 fighting Men, besides the tribes of Levi and Benjamin, but now it is nothing so plentiful; 'Tis now under the Tuck Inhabited by mixt People, pretend-

ing

ing to Christianity, shewing divers of the places mentioned in the Scripture.

Mesopotamia or Diarbeck lying between Euphrates and Tygris, the Soil is exceeding Fertile, and from hence supposed to be the place where the

Girden of Eden was.

Upon Tygris stands Babylon, now called Bagdar, where happened the Confusion of Languages after the Flood, and is only a great Ruinous heap near which place frood the Tower of Babel.

Babylon was built by Nimrod much Augmented by Nebuchadnezzar, it was taken by Cyrus, Darius, and by Alexander the great, who died there.

In the year 1638 when Amurath the fourth retook it from the Perfians, he caused three Men out of every Tent throughout his Army, to be cast iato the Mote, and over them a vast number of Bavins and Woolfacks, that he might the more eafily affault the place.

Armenia now called Turcommia taking its name from the Turks, who being a People of Schythia, and too populous to get food sufficient in so Barren a Country broke through the Caspian Sea, and feated themselves here in the year Anno Domini

844.

Georgia, not so called from St. George whom yet here they greatly reverence but from the Georgi who long ago Inhabited the Adjacent Countreys, the People now though Tributaryes to the Turk, Profets Christianity, and agree in most points with the Greek Church: It is feated between the Euxine and the Cafpian Sea.

Of Arabia.

Rabia is bounded on the East with the Persian Gulph, and Chaldea, and on the South the Ocean, and on the West the Red Sea, and some part of Egypt, and on the North the River Euphrates, with some part of Palestine.

It is Commonly divided into three parts, viz. Arabia the Stony, Arabia the Defert, and Arabia

the Happy.

Arabia the Stony lies near the Holy-Land.

Arabia the Defart, lies near Chaldea and the Euphrates; Arabia the Happy advances it felf between the Red Sea and the Perfian Gulph, which divides it from Persia; and this part is the greatest, and Richeft, and best Inhabited of all.

Arabia the Stony hath for its chief City Herat . which fignifies a Rock, whereon it was built, with an advantagious Scituation, a place of great

Arength.

 O_{λ}^{t}

On the Coast of the Red Sea is the Castle Tar, a Walled Town and a Port, very famous, and it is believed the Israelites having passed the Red Sea, Entered the Defarts this way; and it is likewise a Paffage, where the Carravans stop at their return from Mecca.

Arabia the Defart, so called by reason of the vast Sandy Desarts, and the uninhabitableness thereof, scarce offerding either food for Man or Beast: So that those which travel those Countreys are forced to carry their Provisions with them, and guide themselves to the place designed by the help of the Stars, or Marriners Compass, as they do at Sea, and go in great Companies for sear of being robbed or risled by the wild Arabs.

The People are much addicted to Theft by which they get their living, being front and warlike Men; their Chief food being Venison, Milk, and Herbs; they go half naked; their Wives they hire for what

time they pleafe,

Arabia the Happy may properly be so called by Reason of the Fruitsulness and Richness of the Soil, which Produceth plenty of Corn, Wine, Fruit, and Odoriserous Spices; great increase of Cattel; also abounding in Gold, Pearles, Balson Myrrhe, Frankinsence, and several forts of Druggs

These People are very Faithful and Punctual in their Promises; here are great quantities of Ostriches

which for the most parts abide in the Defarts.

In the Province of Hagiaz, the Chief Cities towards the Red Sea are Medina, and Mecca, this last being the Birth-Place of Makomer, and the other his Burying-Place.

Medina, though Scituated in a Barren and Defolate Place, adjoying on Arabia the Steny, yet by Reason of, its being the Sepulcher of Mahomet, is become a fair City, containing about 6000 Houses, being a place of great Trading and resort, by Reason of the Pilgrims, which slock thither to pay their Blind Devotions.

This Sepulcher or Tomb wherein their Prophet lieth,

licth, is Enclosed within an Iron grate, and Covered with green Velvet, having the supply of a new one every year from the Grant Seignier, and the old one becomes the sees of the Priests, which they still in small pieces and shreds for great Reliques to the Pilgrims, which brings them in great Revenues.

In this Temple are about 3000 Lamps of Gold and Silver, wherein is Bullim and fuch other rich Olours, Oyntments, and Oyls, which are Con-

tinually kept burning.

The People for the most part are of a mean Stature, Lean Swarthy Complexioned, Esseminate voices, very Swift of foot, and very Expert in the Bow and Dart.

The Horses are also little and lean, and spare in feeding; yet Couragious, Swift, and of great Labour.

The People are almost all Mahomitans, except some Greek Christians, towards the Mounts of Sinal and Horeb; likewise towards the Red Sea, and in the Desarts of Arabia the Stony, and Arabia the Desart; Arabia the Happy, is the unhappiest, by having the sewest.

Of Persia.

He Kingdom or Empire of the Sophy of Perfet, is one of the greatest and most fumous of all Afix; it Extends from Tygris and Emphrates on the Events.

of Asia.

67

west, almost to the River Indus in the East; And from the Gulph of Persia, and the Arabian and Indian Sea, which bounds it on the South, unto the River Gelon and to the Culpian Sea, which are its Bounds of the North; so Containing about 600 leagues in length, and 500 in breadth.

The Perfor Mounchy begin under Nims, and lafted up us 30 and old Kings 13 or 1420 years,

ending in Sociamap dus.

It divided it felt into Mrd's and Babylonians, afterwards the Perficus made thenselves Masters of it.

Alexander the Great held this Empire but few Years; and dying, it was divided amongst many of his Capaines, who at last took upon them the

Title of Kings.

Menarchy, feated in the Parthian Territory, which in its Situation—is pleafant and delightful, and in its Soil Frantial, its air Secene and Healthful, and for bigness is now become the greatest City in all Parthia; whose Walls are in Circumference a reasonable Days Journey, containing not less then 75200 Houses.

The Inhabitants do all their affairs on Horse-back, as well Publique as Private, in the buying and vending their Comodities: But the Slaves never Ride, which makes the difference between the n. The Native Comodities of Perfix are Gold, and Silver, Raw-Silker of the great Quantities that they furnish most

part or the Eaft.

The acais in these parts in the Summer season are so eyear, especially towards the South part of the Examinant, that the Inhabitants are forced to for sake

the Cities, and retire into the Mountains for coolues.

The Perficus are of low Stature, yet have great limbs and strong, they are of an Olive Colour, hawk'd Nosed, and Black Hair'd, which they shave every Eight Days; they paint their Hands and Nails

of a Reddish Colour.

In their Habits they follow much of the Turks; their Clothes have no proportion to their Bodies, hanging loofe and large, much in the Fashion of the Women; their Garments they Gird about their Waists with a Scarf; Their Turbants are Red. The Women in their streets, go with white Vailes over their Faces, down to their knees; they are very Neat and Rich in their Clothes and Houses.

The Perfians are very Strict, Superstitious, and Ceremonious in their Religion, as the Turk is. They Bury their Dead three hours after they are departed, Except they Dye in the night: They wash or bathe the Bodies of their Dead before they are interred, in a great Cistern, which they have for the same purpose near the Mosque, to which place they are Carried on a Bier in their Clothes, and after they are stript and washt, they put them in clean Linnen, Anoint them, and so bear them to the Grave, being accompanied with his Friends, Relations, Servants, &c.

The King of Persia Governs by an absolute Power, disposing of the Lives and Estates of his Subjects, as best pleaseth him, making his Will his Law, not daring to Murmur, though his Actions

are never fo unjust.

The Administration of Justice is decided by the E 2 King,

King, but first tryed by the Secular Judges, who Examine the same, and deliver up their Opinion to the King.

They have feveral Severe and fleich Punishments, which they inflich upon the Orienders, according to the Hainonfnets of the Colones; for some Offences they cut off their Hars and Nese, sometimes their Foot and Hunds, for others to be Beheaded; for some again, they are tyed between two boards and so sawed asunder, with several other cruell Deaths, too tedious to name.

In their Military affairs they are well Experienced, their Army confishing only of Horse, who have for their Armour Darts and Javelins, yet have they some in the Nature of our Dragoones.

They have great quantity of all Sorts of Cattle, Grain and Fruits; amongh their Fruit Trees, they have great quantities of black and white Mulberry-Trees, which grow not above five or fix Foot high, which ferves for Food for their Silk Worms, which makes them great frore of Silk.

Of the Empire of the Great Mogul.

The Great Mogul, is one of the greatest and most Powerful Princes of Asia, whose vast Employ to aprehends the Greatest part of the Continent of India. In which large Territories there are

are several Indian Kingdomes Tributary to him; He is esteemed the Richest Prince of the World; V Shat Johan who Raigned 40 Years, left him, behind him, five Millions of Livers: And the Throne that he made cost one hundred and Sixty Millions, and Five-Hundred-Thousand Livers, besides six other Thrones, set all over with Diamonds, Rubyes, Emeralds, and Pearles.

He is able to bring into the Field One-Hundred-Thousand Horse, and Two-Hundred-Thousand Foot,

and two or three thouland Elephants.

The Great Moguls Ordinary Guard Confifts of about twelve-Thouland Mea, besides Six-Hundred of his Life Guard; he never stirs abroad to Hunt, take the Air, or the like, without the Atendance of Ten-Thousand Men of all Degrees; besides, to make his State the Greater, there are one Hundred Elephants, Richly trapt and covered with Scarlet Velvet, or the like; on each of these E'ephants there are feated two Men, the one to guide him, and the other Supports a large Banner of Silk richly Embroidered with Gold and Silver; after these Hundied Elephants comes the Mogul, either mounted on an Excellent Horfe, or elfe in a Coach or Sedan, attended by his Nobles and other Courtiers: After whom comes about Five-Hundred Elephants, Camels and Waggons, which are to Carry the Baggage; For he Commonly Encamps in the Field, to have the Benefit of the Coolness of the Air: The Megul Celebrates with great Pomp and State the first Day of the Year.

The Emperour himself is a Turkish Mahametan, although the most part of his Vassals are Pagane;

For as there are feveral forts of People, fo there are divers forts of Religions amongst them. The Country is very Fertile, yielding great store of Corn and Pice; and all Sorts of Provisions are very Cheap, and the Inhabitants very Sober and Temperate.

It is conceived to be the largest Country of any one name in the World, (Except Count and Tin-

taria.)

The whole Countrey is Divided into two Penin-full's, eve Peninfull is accounted on this fide the River Ganges, called India Intra-Gangen, and the other Peninfula beyond the Ganges, called India-Extra-Gangen, of each we shall take a Brief Survey.

Of India on this side the Ganges, called India-Intra Gangem.

India-Intra-Gangen, is bounded on the East with the River Ganger, till the fall thereof into the Sea; And after, that with that large and spacious Bay, called the Gald of Bengala. On the West, with the Territories of the Positive Empire, and part of the Indian Seas; On the North where it is broadest with Mount Turns; On the South with the Indian Oceans, ending in a sharp point or Promotors, as you may tee in the Map.

We Divide this Peninful vinto ten parts or Divitions, being under reveral Kings, Governments, and Religions. In the Kingdom of Cuncan, are Goa,

Vifa-

Mongrelia: Goa is a City, as fair, Rich, and of as great Traffick as any in the East-Inwes, being Situated on an Island of the same name, taken by the Portugals in the Year 1510, and have since that Established themselves so Powerfully there, that their Vice-Rey, Bishop, and their Council, for the East-Indies, have their Residence there; Their streets are large, their Houses sair, especially their Palaces and Publick Buildings, which are very Magnisicent, their Churches are Stately, and Richly Adorned; The City is 15 Miles in Compass. The Portugals live here in all manner of Delight and Pleasure.

Here on this Coast is also Situated Surrat and Bombay, two great Factoryes of the English

Merchants.

The whole Countrey is under the Government of the Savagee, who is a Tributary to the great Mogul. The People bloudy and treacherous, addicted much to the Art of Poyfonning, and do Fight commonly

with Poyfoned Arrows.

A notable Instance of their Treachery I shall give you; Which was in the Year 1683. There was three of their Ships and sour Grabs, man'd with 1500 of their Men, which the Suvages afterwards (by way of Excuse) pretended to be Arabians, and took the Ship to be a Partuguese, and as a token of their Resentment suppresented the Chief of them; They set upon one of our Est India Ships, call'd the President, Captain Janathan Hide Commander, whom they Attaqued very desperately, and was as Briskly received by the English, and as bravely Repulsed with a great Saughter of the Indians: And Re-

Recovered their Sup, to the great Comendations of all that were there in. Which brave Souls had not the Huppiness to Enjoy the Honour of that Action in their own Countrey. The Ship being unfortunately cast away in February sollowing, and all their Men loss but two, as they were coming into the Chanel, to the great grief and sorrow of the Merchants and Owners, as well as their Particular Friends and Relations.

Malabar, extends its felf from the River Gange-race, to Cape Coma ine, 300 miles in length, but is not above 50 in breadth, and ending towards the Cape in a Point; The Countrey is more Populous for the length's then any in Ladia, enjoying a very Temperate Air, and a Fruitful Soil, well Watered, and indented with many Creeks; The Ground unfit for Corn but Plentiful in Rice, and all manner of Spices, as Ginger, Cinnamon, Caffia, Pepper, and most Excellent Fruits.

The People on this part of India, are of a blacker Complexion then the rest of the Indians, well Limbed, wearing their Hur long and Curled: About their Heads they wear a Hunkerchief, wrought with Gold and Silver, and about their middle a Cloth, which haugeth down to conceal their Nakedness.

The Natives on the whole Coast of India, are of Nature Treacherous and Blom'y, more properly to be termed Desperate, than Stone and Valuat; in their Wers they are Poyioned Arrows, as they do in their Pyrating and Thierings both by 5-2 and Land.

The Kingdom of Process, fixed in the Bayof Bing da, between twelve and fixed Degrees of North Latitude, in which Kingdom is the great Factory

Factory of our East-India Company, called Fort St. George; almost all the People are Idoliters, some Mahametans and a few Carlonques. Amongst the Customes of those Heathens, they have the Inhumane Custome for the Women, to Burn themselves with the Corps of their deceated Husbands, (in this manner) the Husband being Dead, the Wife prepares her felt for her Fineral Habite in Transparent Lawn; Her Nofe, Ears, and Fargers the Adorns with Precious Stones, in one hand She holds a Ball, and in the other a Nofegay of Flowers, both as Emb'ems of Paradife: And being thus Habited: She is Accompanied to the place by her Relations, Friends, and Acquaintance, and all the way Going, the Prieft denotes the Joys She is to Posless, together with the Affirance of Enjoying her Husband, which does Excite her to Valour; fo that when She cometh to the Place, feeth the Flame, and the Carcais of her Dead Husband, whom She longeth to be with, and being as it were Transported with Joy, She takes leave of her Friends and Relations, and Jumps into the Flame, in which the Corps of her Husband was first put, both which is soon Reduced to Ashes, during which time they have feveral forts of Mulick, to Drown the Cryes of the poor Wretch, cafting in flore of fweet Wood and Oil into the Fire, to take away the Unfavory farell.

Of the Island Ceylon.

The Island Colon, lyeth to the Eastwar I of Cape Comarine, of an Oval form, divided from E 5 the

Refreshing it with their Dews; The Air with Fra-slands, as is Reported by some that have been there; grant freshness.

A General Description

besides Fruits, Lemons and O. anges, &c. Of Fowls The King Resides in the Isle of Mil, which is one and Beasts great Plenty, both Wild and Tame; It of the greatest; but not above a League and a half fo abounding with all Contentments, that the Indians in Circumference, but it is a most Fruitful place, high Hill, called Alam's Pico, reputed to be seven

Leagues high.

Body, in matters of Religion they are generally Idolaters, very Active and well Skilled in Jugling. This Island is Divided into several Kingdoms, as of Candie, Se. And a City of that Name, the Seat of the King. This Illimil is memorable for the 20 Years Captivity of Captain Know, and of his Miraculous Ecape, which when he Returned to England, he wrote a large Treatife of the Nature of this Island, and the Manners and Customes of the Inhabitants, (to which) I refer you.

Of the Maldive Islands.

TEar unto the Coast of Malabar, lieth a great Number of Islands, called Maldive, from Mal, the City of those Islands, and Dive which fignifies an Island; They are Divided into 13 divifions, divided by certain Charmels. From hence the King of Maldives terms himself King of 13 Provinces

the Main, by a shallow Chanel. The Havens inces, in which are Contained Eleven-Thousand ere they take Multitudes of little shells, called The Land stored with whole Woods of Cinamon, Couries, which pass in many places for Money. hold it to be a Paradife; In this Island is a mighty trangers frequent it, because of the Court; There Glows on these Islands neither Rice nor Wheat, yet all forts of Provisions are Cheaper here then in The People for the most part Tall and Strait of Jother parts of India; There are here abundance of Cocoe Nuts; they have little Beef or Mutton, no Dogs (for they Abhor them,) they have great store of Fish. The Inhabitants are very Industrious and |Sober People.

Of India beyond the Ganges; called India-Extra Gangem.

Ndia Extra-Gangem, is that part of the great Continent of India, which lieth on the East-side of the River Ganges; In this Peninfula are a great Number of Kingdomes, but I shall only discourse of the Principal ones that are Contained in the Table, which are Arracan, Pegu, Martaban, Siam, Cambodia, Couchin, China, Malacca, and Tanquin.

The Kingdom of Arracan is Situated on the Eaftfide of the Bay of Bengala, extending it felf from the Tropick of Cincer to the fixteenth Degree of

North

North Latitude, it being a brave and Fruitful Country. The Kingdom of Pegu, when in its Splendor, was fo Rich and Powerful, that some would equal it to China. They have in many places Mines of Gold, Silver and Precious Stones; Besides Grains, Fruits Herbs, Fowl, and Beafts, which are here found Excellent. And without doubt it is the Richest Country of all the Indies, and for the same Reason

one of the best Peopled and most Powerful. The Chief City of this Kingdom is Pegu, the Metropolis; The Houses well Built; The Palace-Royal is Seated in the midft of the City, having its partitular Wall-Moar and other Fortifications.

The Habit of the Natives is but mean, contenting themselves for the most part with a piece of Linnen, to Cover their Nakedness; They all black their Teeth, because they say Dogs Teeth are white; They are Generally all Pagans; Those that Marry, Buy the r Wives of their Parents.

The Kingdom of Mareaban towards the Gulf of Bengalt, is Contiguous to Pegu, to which it hath been Subject, at prefent to Siam; this Kingdom hath many Ports frequented for Trade, for befides its Grains, Fruits, Oyls, and Medicinal Herbs, it is Rich in Mines of Gold, Silver, Copper, Ge.

The Kingdom of Siam hath feveral Cities of Note, but we shall (for Brevity sake) only treat of Siam, as the Metropolis, being a City of large Extent, and of 6 great strength, that in the Year 1567, they stoutly defended themselves against an Army of 1400000 Fighting Men, which the King of Pegu brought against them, for twenty Months together. The Comodities of this City and Kingdom are Cotton, Linnen of several sorts, Benjamin Lacque, of which they make Excellent hard Wax.

The Kingdom of Cambedia, which lieth between the Gulfs of Stam and Couchin-China. The Principal Cit'es Rivecca and Camboja; The People in their manners and Cultomes, Resemble those of

Sinn, whose Subjects they have been.

The Kingdom of Couchin-China, lieth to the Eastward of Camboja, its Name fignifies west China, and was supposed formerly to belong to China, whose Language, Manners, Customes, Government, Religion, and other Ceremonies, they yet retain. All the Countrey is Fertile, abounding in Rice, Pruits, and Herbs. They have Gold, Silver, Silk, Porcel un, and many other valuable Commodities; The Air Healthink, and the Soil fo Abundant in all things, that the Iuhabitants know nothing of Contagion, or Famine. They are Courteous, Liberal, kind to Strangers, and Faidhful in their dealings.

In the Peningula of Malacca, are diverse Kingdoms, which are Tributary to Siam, Except the City of

Mallacca.

ton,

The whole Country is well Traded, by Reason of its Archepelago, which contains feveral Islands, and of its Ifthmus, which facilitates the Transportation of Merchandise, from one Sea to another;

and of its Ports, which are Commodious.

Patane, within few Years is grown Famous; The Kingdome being frequented by diverse Nations, perticularly the Chinois, who bring thither Parcelain, and divers Manufactures and Instruments of Husbandry; The Soil is good, producing Fruit every Month in the Year; Their Hens, Ducks, and Geele, often lay Ibor Eggs twice a Day,

Ther is Situated on the utmost point of the Peninsula, its Chief City was taken and ruined by the Portugals in 1603, who took from thence Fifteen-Hundred brass Cannons.

The Kingdom of Tanquin, divides China from Couchin-China, and bath about 150 Leagues of Sea Coast. This Kingdom contains 7 Provinces. The King of Tanquin, Ordinarily entertaines a Militia of Tanquin Man.

of 50000 Men.

The Land bath Beautiful Plaines, and Watered with many great Rivers; They have neither Affes nor Sheep, but many Horfes, Elephants and Rhinocerotes, whose Fleth, Skins, Bones, Teeth, Nails and Horns, serve for Antidores against Poyson; The Catholique Religion was so Introduced some Years past, that there was estimated to be more then 200000 Christned Souls; Two-Hundred great Churches, and great Quantities of Chapels and Oratories, but since there bath hapened great Changes; in those Kingdomes the Portugals have several Towns and Cities, by which they have a great Revenue.

Of the Island of Sumatra.

He Island of Sumatra, lieth on the North of Java Major, and a long the West-side of Mallacca, the length thereof Extends siom the North-West to the South-East, about 800 miles, and is 200 in breadth.

The Air is very hot and unwholfome, by Reafon

of the grofs Vapours, drawn from the many Fens and Rivers, which are found to be in it. The Soil not Capable of fuch Grain as in other places, except Rice and Millet; it Affords great plenty of Wax and Honey, store of Silks and Cottons, Rich Mines, not only of Tin, Iron, Copper, Sulphur, and other Minerals: But of Gold fuch quantity, that some conceive this Island to be Solomons Ophir, for one of the Kings thereof wrote a Letter to King James, wherein he hinted the Riches of his Country Abounding in Gold, and that he had in his Dominions a Mountain of Gold, King of which Golden Mountain, he Intituled himself in his Regal Stile, his Title is also King of Achem. His Government is Absolute, and meerly Arbitrary, executing what he hath a mind to, without form of Law. So Cautelous, that without his Placard, no Stranger can have Ingress into his Dominions, nor is Admittance to his Presence granted to any whom he first sends not for, by an Officer with a Gilded Staff; He is conceived to be strong, both by Sea and Land; his Country Populous, his Elephants many and well Trained.

Of the Island Borneo.

The Island Borneo, is Situate under the Equator, and is Adjudged to be more then 2200 miles in Circumference. The People Generally more white then the rest of the Indians, of good Wits and Aproved Integrity.

Of Affa.

The Country is faid to be provided Naturally, with all things Necessary; But unfurnished with Asses, Oxen, Herds of Cattel, except only Horfes, and those but finall of Stature; the great Riches of it, being Campbir, Agarick, and some Mines of Adimints.

The Island is divided between two Kings of two Religions; The King of Borneo and his Subjects are all Mahumetans, and those of Laus still Remaining in their Ancient Gentilifine. Thefe think the Sun and Moon to be Man and Wife, and the Stars their Children, Afcribing to each of them Divine Honours, to the Sun especially, whom they Salute at his first Rifing, with great Reverence.

Their Publique bufinefles are Treated of com-

monly in the Night.

The King of Bornes keeps the Greater States not to be spoken with, but by the Mouth of some of his own Interpreters, and in his Palace Served by no other Atendants, than Maids or Women.

Of the Illand Lucon.

I He Island of Lucon begineth at the thirteenth Degree, and continueth up to the Ninteenth Degree of North Latitude, lying South from China. Minulla is its Chief City, well Built after the Modern way, and its Houses are of free Stone, Built by the Spiniards; this being one of the Philippine Islands; So called from Philip King of Spain. The

The Governour, or Vice Roy of these Islands as also an Arch Bishop, who hath a Spirita : Jurissiction over all these Islands which he exercises by three Suffagan Bishops.

This City is very populous, here commonly refiding 15000 Chinois, besides Japoneses and Spaniards, which drive a Trade in several good Com-

modities.

Of the Island Paragoa.

He Island Paragoa stretcheth it self Southwest, and North-East, in length above 100 Leagues not having above Ten, Fifteen, or Twenty Five in breadth, it begins almost at the Eighth Degree, and ends not till the Eleventh Degree of North Latitude. It is faid, that it bears Figs as thick as ones Arm. Its King is a Vassal to him of Borneo.

Of China.

Hina is bounded on the North, with Altay and the Eastern Tartars, from which Continued with a Chain of Hills, (part of those of Ar aat) and where that Chain is broken off, or interrupted with a great wall, extended 400 Leagues in Length.

On the fouth part with Couchin, China, and partly with the Ocean; on the East with the Oriental Ocean, and on the West with part of India. It is said to contain in Circuit 3000 Leagues, Containing not less then Sixteen Provinces at this day. The Country is very Rich and Fertile, so that in some places they have two and in some three Harvests in a year.

The People are for the most part of a Swarthy Complexion, short nosed, black eyed, and very thin beards; they wear their Garments very long, with long loose sleeves, and their hair long; they drink their drink hot, and eat their meat with two

sticks of Ivory or Ebony.

The Son is bound to follow his fathers occupation; The People are good Artificers, Ingenious and Excellent in all things they take in hand, as the Purcelian Dishes, curious Carvings, and the fine painted works which comes over from thence doth manifest. They are esseminated with ease and pleasure; and are not much given to Wars.

Of both Sexes, there is thought to be Contained in this Country not fewer then Seventy Millions, In Matters of Religion, are generally all Gentiles.

The Forces which this King is able to draw into the Field, must needs be infinite, Confidering that incredible number of Subjects under his Command, for whereas France is thought to Contain Fiscen Millions of People, Italy with the Isles, as many, Germon with the Switzers and Brigick Provinces about that Proportion; Spain not above Seven Millions, and the Kingdom of England and VVales not above Five Millions which

is in all 57 Millions, his people is 13 Millions more, then all these put together. The Government of this Kingdom is Tyrannical, there being no Lord but the King, no Title of Dignity or Nobility known amongst them, nor Toll or Duty paid to any but to him.

The Dignity of the Crown is Hereditary, falling to the Eldest Son after his decease. The King, they highly reverence, calling him the Son

of Heaven, and the Son of God, &c.

The great City of Pequin, now the Seat of the King is of a vast bigness, Containing within its Walls 3300 Pogodes or Temples, wherein are continually facrificed a great number of Wild Beafts and Birds. In the Walls which encompasseth this City are 360 Gates, to each of which is jovned a finall Fort, where a Guard is continually kept as also a Register to take the names of persons. that pass thereat, each of the streets having his Captain and other Officers who are to look after the same, and every night to thut up the Gates a Here are about 120 Aquaducts and Canals upon which are near 1800 Fair Bridges fuffained on Arches. This City is the Residence of the King, when he is in the Northern Provinces as Nanquin is in the Southern.

Of Tartary.

Artary is seated on the most Northern part of Asia, and extends it self from East to West; from the River Volga, and Oby (that F 2

Λ

General Description.

OF

AFRICA.

CHAP. I.

FRICA is a Peninsula so great, that it makes the third, and most southerly part of our Continent. It is bounded on all sides by the Sea, it is by the Latines called Africa, and the Greeks the Straights of Gibralter, divides them, and is joyned to Asia only by a small Islimus of Thirty or Forty Leagues between the Red Sea, and the Mediterranean.

It is ever y where Inhabited, (though not so well as Europe and Asia,) partly by reason of the unfupportable heats, and partly for want of water in many dry Countryes.

F 3

Λs

feparates it from Euprope) unto the streight of Jefo which separates it from America. Their Neighbours are the Muscovites on the West, on the North the Tartarian Sea, and the Persians, the Mogolls and the Chinois on the South, on the East the Straits of Jesso or Anian, not yet certainly known.

The People are of an indifferent Stature, ugly Countenances, thick Lips, Hollow Ey'd, Flat Nofes, broad faced, very strong, stout, Valiant, and good Warriers, very Active, Vigdant, exceeding quick of foot; patient in all assistants, they are very Rude, barbarous, and revengeful, do eat their Emerics, and drink their blood, as Wine at Feests.

Their Habit is mean, made of Course stuff, reaches but to their Knees, yet they are very Proud, and think their Cham to be the greatest Preude in the World.

In Matters of Religion they are generally Pagans and Mahomera s. The Pagan being the best Gentleman, being of the Elder House.

Their Food is mean and flattifity deelt; they

eat Flores, and Arink Mares Milk.

The Government is Transical, their Great Chan being Lord of all, in whose Breaft lyeth the rLaws. Every nan hath the liberry of naving two or three Wives, which they never choose, but out of their own Tribe.

The Country is very Fertile in most places, 2-hounding in Wheat, Rice, Wool. Hemp, Sik, Musk Rubaib, great Herds of Cancils and Hortes, which they vend to the Canois, Magella, and other in hans that comes thicker to Traick. A

Of Africa?

87

As to its divisions. In the higher part of Africa is Barbary, Billedulgered and Exper; further South is the defarts of Zaura, the Country of Negroes and Guiner; in the higher Ethicpia, or under Expers are Number, Adifficia, and Zanguebar; In the lower or Inferiour Ethiopia, Congo, Mono, Monapa, and the Cafrees.

burtanestends it self along the Mediterranean-Sea from the Ocean to Egypt, and is bounded

on the South by Mount Arlas.

Bille July 1 d lies along this Mountain, likewise from the Ocean unto Egypt, bounded by Zuara, or defart. In price only one valley from the Catamars of Nile unto the Mediterranean-Sea. Likewise Zuara the defart, the Country of the Negroes and Guinea, stretch themselves from the Ocean unto the high and low Ethiopia; We have divided Echiopia into the higher and lower placing in the Higher, Nubia, Abissina and Zanguebar; in the lower Congo, Monomorapa and Cafrees.

The Mountains in Africa are in great number and are very remarkable for their heighth, and the Mettals were with they abound. The most famous are Mount Atlas, those of the Moon, and Siere Lione; Atlas was the most famous amongst the Ancients, who believed it bounded the world on the South; The Mountains of the Moon are higher than any in Europe, and are alwayes covered with Snow and Ice. The largest and most famous Rivers of Africa are the Nile and the

Niger.

The Emperors, Kings and Princes which at prefent

prefent possess Africa are in very great number 5 The most powerful and Considerable, are the g eat Turk or Sultan of the Ottomans, who hold all Egyp, a great part of Earbary, and almost all the Coast that touches the Red Sea. The Negus of the Abissines, who possesses the faireft and greatest part of the Higher Ethiopia, the Xeriffs of Fez and Morocco, which have held those two Kingdoms in Barbary, in which Country was fituated the City and Garrison of Tangier, belonging to his Imperial Majesty of Great Britain, which was demolished in the year 1684, managed by the prudent Conduct of the Right Honourable George Lord Dartmouth in the Ship of Grafton, and feveral others under his Command.

The Religions in Africa may be reduced to four, viz. M. thometism, Christ: mity, Paganism and Judussin, Mahometism, possesses Barbary, Bile-dulgerid, Egypt, Zaara the desart part of the Negroes and a good part of Zangubar. Paganism holds part of the Negroes, Nubia and Guine, and all the Lower Ethiopia, with the Castrees, and some mixture otherwhere. Christianity holds in Africa almost all the whole Empire of the Abissines, and part of Egypt, and by the Portugals in their several Factories and Colonies that they have up-

on the Coasts of Africa.

As for Indaism it is scattered in many Cities on the Coast of Barbary, as at Morosco, Fez, Algier, &c. Likewise in Egypt, and on the Confines of the Abassines.

CHAP:

CHAP. II.

Of the Country of Africa in particular.

Of Barbary.

He People in Barbary are of a duskish or blackish Complexion, of Stature Tall and well proportioned, they are of an Active Disposition for Horsemanship, otherwise excellive idle; they are very subtil, close, persidious, inconstant, Proud, much addicted to Luxury; and therefore by consequence very jealous of their Wives, whom they keep with great severity, and that the more according to their handsomness.

Their Re. gon is Mahometism, and are for the

most part in "ned to Literature and Arts.

The Moores of Fez and Morocco are well disposed, strong, active, and yet melancholly, they may marry four Wives, and as many Concubines as

they can keep.

88.

Here the women at the death of their friends, assemble themselves together, habit themselves in Sackeloath and Ashes, and sing a Funeral Dirge to the praise of the deceased, and at the end of every Verse howl and cry, and this they do for seven days together.

Of

Of Billedulgerid.

Billedulgerid, or Land of Dates, hath Barbary on the North, from whence it is feparated by Mount Atlas, on the fouth Zaara, on the west the great Ocean Sea, and on the East Egypt.

The Air is healthful, they live long, are deformed, and are held base people, ignorant of all things, are addicted to Thest, Murther, and are very deceitful, they feed grossy, and are great hun-

ters, they acknowledge Mahomet.

Of Zaara.

Aara is an Arabian name, and signific Defait; The Country is generally hot and dry, it hath but little water, except some sew wells, and those salt, if there falls great rains, the Land is much better; but besides the leanness of the soil, there is sometimes such vast quantities of Grashoppers, that they ear and ruine all that the earth produceth.

It is so barren and ill Inhabited, that a man

may travel a week together without seeing a tree, or scarce any grass or water.

The People are Bereberes and Africans, almost

all follow Mahomerism.

This great defart is divided into five principal parts, as is shewed in the Table and Map.

Of the Land of Negroes.

He Negroes are People about the River Niger, which hath taken its name from these people, and these people from their Colour.

In this Division are placed several Kingdoms as you will find marshall'd in the Table; and what is

remark. Lie in them, we shall briefly touch.

Some of the Kingdoms are rich in Grain, Cotton, Cattle and Gold, the Country of the Negroes is esteemed as sertile, as those watred with the Nilo; it bearstwice a year, and each time sufficient to surnish them with Corn for five whole years; which makes them not sow the Lands, but when they judge they shall have need; they keep their Corn in Pits and Ditches under ground, which they call Maxamores.

The People are generally idle and ignorant but

bear great respect to their Kings.

of Guinea.

O'mea is that part of the Cosst of Africa, which is found between the River Niger and the Equinoctial Line. This Coast from East to West

7 or 800 Leagues long, and not above 100 or 50 in breadth.

The Soil of Guinea very fertile, and for the most art bears twice a year, because they have two Summers and two winters. The Comodities of the country are Gold and Elephants Teeth in great amidance, in Wax, Hides, Cotton and Ambericase, and for these Commodities, they barter for ourse Cloath, both Lumen and Woolen, Red Cops, Freez Mantles and Gowns, and leather bags, Guns, Swords, Copper Bars, and Iron Knives, Hammers, Axes, &c.

The Inhabitants go naked, fave about their Vafte they tye a piece of Linnen, yet very proud and tarely, in matters of Religion, great Idolaters workping Beafts; on this Coast are several Factories belonging to the Royal African Company.

Of Congo.

Othe fouthward of the Equinoctial Line, and unto Cape Negroe lies the Kingdom of Conis, and is faid to be the fairest of the lower Ethioina. The Inhabitants are naturally very sweet, and the able and strong of body, but dull and idle, their money is of grey shells, their Grains, Fruits. Wasters, Fowl, Sea and River Fish are excellent, they have store of Elephants, Mines of Silver, Iron, Chrystal, Marbie, Jaspar, Porphyre, Se. They know no History but by the Reigns of their Kings.

The most famous Rivers of this Kingdom are the Zaer, the Leiunda: the Zair descends from the Lane of Zair, from whence also descends the Nile

Nile, The Zier hath 400 Leagues Course, and is very Rapid by Pason of the Cataracts or great falls, which it hath from the Mountains.

Of Biafara.

Lafara is a Kingdom in the lower Ethiopia, for a sudden occasion, a million of fighting men, Seamen called the Bight) the people very Bar-people profess the Christian Religion, which was barous, their habits made of Mars, they adict them- sieft made known to them by the Emuch of Queen felves to Witchcraft, and sometimes facrificing their Cindive, who was biptized by Philip the Evangechildren to Devile.

Of Monomotapa.

this Prince deports himself with gravity, and that there is no access to his person, but with very great fubmitfions, he is alwayes adorned with Chains and precious stones like a woman:

The Inhabitants are all black, of mean Stature, and excellent good footmen, that they are faid to

out-run horses.

The Woods have great store of Elephants as alfo other Beafts; rich Pastures well turnished with Cattle, plenty with Grains, Fruits, Fowl, and is well watered with Rivers, in which are abundance of Fish, the Air temporate, their summer is when we have our winter, and their winter is when we have our Snumer.

Of the Abissines.

THE Empire of the Avissines Heylin makes to be the Dominions of Prefler John, and faith he is of such great force that he is able to raise upin the Gulf of St. Thomas (by our English- his Government is absolutely Tyrannical; The lift, and more generally by the Preaching of Saint Mathem the Apostie; since which they have much fwerved from the Purity of the true Religion, by their many Corrupt Opinions, they keep many of the Cere notices of the old Law, they keep the feventh HE Monomorapa, that is the Emperor King, day Sabbath according to the fourth Commandor Soveraign of Motapa; and possesses an ment, they allow their Pricsts no yearly mainte-Empire so great, that it is 1000 Leagues Circuit, nance, neither will they suffer them to beg, they get their livelyhood by their own labour, they administer the Ordinance of the Lords Supper to Infinits prefently after they are Baptized, they Baptile themselves in Ponds and Lakes every Ephiphany day, supposing that to be the day that John Bapltized Christ in Fordan.

Titles of the Emperor as Dr. Heylin doth inform

m, are as followeth, viz-

Supream of his Kingdoms, and the beloved of God, the Pillar of Faith, sprung from the stock of That the Son of David, the Son of Solomon, the Son of the Column of Sion, the Son of the feed of Freeb, the Son of May, the Son of Naka, after the flesh, the Son of St. Peter and St. Paul, after the Sprit. Emperour of the higher and lower E-Of utropia, 😂 ta

Of the Islands

Belonging to

AFRICA

Hose that are situate in the Occidental or A lantice Ocean, may be Marshall'd into three Bodies of Iffinds, viz. the Islands of the Azores, the Canaries and the Islands of Cape de Verde.

Of the Islands of Azores.

H: Azores are nine in number, which are 1 S: M. conel, 2. St. Macres, 3. Tercera, 4. St Gratiofa, 5. St. Goorge, 6. Foral, and 7. Pico, 8. Flo res, and 9. Carvo. The Air of these Islands is ge gerally good, they are well stored with Fleih, Fish and Fruits.

Of the Canary Islands.

The Canary Islands are in number seven, The Names are as followeth, viz. 1. Lancerotta, 2. Forteventura, 3. Canaria, 4. Teneriffa, 5. Pal-

ma 6Ferro . ndGom'ra.

These Island abounds in excellent Wines. Honey, Wax, Sugar, Oade, Lawrel-trees, Dragon-trees. out of which they draw a Red Liquor, called by our Apothecaries Sanguis Dracomis. Also Corn and Sugars, and all forts of Fruits, stored well with Cattle, and is therefore the victualling place of the King of Spains Plate-Fleet.

To the Northward of these Islands lyeth the Ifland of M. dera: belonging to the Crown of Portugal, The Air very wholfor, refresht with pleasant Fountains and Rivers, it yields also a pleasant

Wine called Madera Wine.

The Islands of Cape de Verd.

Hele Islands are in number ten, bearing the I name of 1. St. Mayo, 2. St. Anthonyes, 3. St. Vinc mt, 4. St. Luce, 5. St. Nicholas, 6. Isle de Sal, 7. Bona Vista, 8. Isle de Fuego, 9. Brava, 10. St. Jago; Some of these Islands yields good store of Salt, but the Air of them is not very wholfome.

Princes Island yields Fruit, Sugar, and Ginger; and and is the Revenue of the Prince of Portugal, and therefore called Princes Island.

Annobon yields Sugars, Cottons, Cattle, and Excellent Fruits, and Oranges. Inhabited by

Portugalls.

St. Helena lying in fixteen degrees fouth latitude belonging to the East-India Company, well furnished with good water, which alone is a great refreshment to the Ships that return from India, the Valleyes are very Fertile, the Air healthful, that fick persons are in a short time restored to their health; There are also in this Sea the Islands of Ascention, and St. Muthewes, affording Fowls and Wild Beafts, but not Inhabited.

Zecatora and Babel Mandel lies towards the Red Sea where the passage is narrow and most convenient from the Coast of Africa, Zocatora, near Cape Gauderfu is under the Jurisdiction of an Arabian King, it is a good Road, and hath convenient Bays where Ships may ride secure among the very Rocks. It affords excellent Fishing, Cattle in great abundance, and is famous for the quantity and

goodness of its Aloes.

Of Madagascar.

THe Island of Madag foar is the bigest of all the Islands that belong to Africa; The Air is temperate, the foyl produces several forts of Grains and Trees, the Waters excellent the Fruits delicious. The Mountains are full of wood, Pasturage and Plants. Sc. The Natives very black, and of Rude Behaviour, partaking of the Customs and Manners of the Africans.

General Description

AMERICA.

CHAP. L

MERICA, so called from one Americus Vefucius (who following the Steps and Examples of Columbus and Cabot) Discovered a part of this great Continent, which might as properly have been called Columbana, Sebastiana, or Cabotia, but most improperly the West Indies.

It is bounded on the East with the Atlantick Ocean, on the West with the Pacifiek Ocean, on the South with Terra Australis Incognita, from which it is separated by the Streights of Magellan: The North bounds of it not hitherto so well known as that we can certainly affirm it to be an Island or Conti-

nent.

The Natives are Fair and Clear, little inclining unto Blackness, being generally Tall and well proportioned, their Eyslittle and black, strong and healthful; for the most part Naked, unless a Cloth about their Waste.

Their Houses are Mats or Bark of Trees set on Poles, in a fathion of our English Barnes, they lie on Reeds or Grafs: As to the other Rights and Cufroms, I shall mention in the respective place.

For their Original, 'tis supposed to be of the Jewish Race, that is of the Stock of the Ten Tribes, and that for the Reasons following, 1. They were to go to a Land not planted or known. 2. Their Countenances and Children resemble the Jews. 3. They also agree in several Rites and Ceremonies, for they reckon by the Moon. 4. They Offer their first Fruits. 5. Many words they have of the Hebrew Ideom amongst em. 6 1 cy have a kind of Feast of Taborraction of the Cold to Build their Altar upon Two le Stores. S. Toda Modding is a Year, 10. Cuftoms of Women as to their Separation from their Hurbands, after the manner of the Law of Moles.

It is commonly divided into Two Parts, viz, into South and North America, the feveral Colomes

thereof take as follow.

CHAP. II.

Of South America in Particular.

Of Magellanick Land.

T lies upon the Southernmost part of America, near the Streights of Magelian, whose Name it still bears: It is a very poor Countrey, much subject to Cold:

of AMERICA.

Cold; the Natives live in Caves: We have the Names of some places; as 1. Defaguadore, and 2. Magellanick; but having no perfect knowledge of them, I can fay little thereto.

Of Paraguay.

DAraguay or rather Plata, so called by reason of a River of that Name that Waters it, the Countrey is very pleafant and delightful, for it abounds in Corn, Vineyards, Fruit Trees, and Cattle in abundance; places of most note are 1. St. Jago D'estra, 2. Villa Rica, and 3. St. Anne.

Of Chili.

Hili bears the Name of one of her Valleys; much I subject to Cold, yet in some parts the Soil is fo fertile and pleasant, that no part in all America more refembles Europe; it yields Ostriches, Copper, and the finest Gold in the World. St. Jago, Imperiale, Baldavia, and Castro are the principal places of Chili.

Of Peru.

DEru, though it gives Name to all the South A. merica, yet it is but meanly furnished with Food, the chiefest thing being Maize, which is not very very Plentiful: The Commodities are Gold, Cotten, and some Medicinal Drugs; it is divided into 1. Quiro, 2. Truxillo, 3. Lima, 4. Cusco, and 5. Arica, of which we have no other Relation than what the Spaniards reports.

Of Brafil.

Though it lies under the Torrid Zone, nevertheless the Air is Temperate and Fertile: The Commodities besides Brasil, are Amber, Balsom, Tobacco, Train-Oyl, Cattle of divers forts, Sweet-Meats, and Sugar in abundance: It is divided into several Capitanies, as 1. Siara, 2. Saltan, 3. Para, 4. Paraiba. 5. Pernambuco, 6. St. Salvador, 7. Ilheos. 8. Porto Segaro, 9. Spirito Sancto, 10. St. Sebastian, and, 11. St. Vincent.

Of Amazones.

Mazones or Guiana, hath its Name from a River fo called; the Air is Healthful, the Soil is good in some places; for Tillage of Maniac, Cotten, Sugar, Tobacco, Gums, Wood, Stones of divers sorts, Parrots, and Monkeys: Places of most Note are 1. Coropa, and 2. Villago D'or, but very little known to us by reason that the Spaniards suffer none besides their own Nation to come into the Countrey, but kill all strangers they find.

Of Terra Firma.

R Castill del Ore, the latter given by the Castilians; the chief places are I. Panama', 2. Cartagena, 3. St. Fed Bagota, 4. Venezuola, 5. Surranam, and 6. Manoa. The Air is very unhealthful, the Commodities divers, as Balfom, Rosin, Gums, Long Pepper, Dragons Blood, Stones of divers forts, and Gold: They have several forts of Beasts, as the Viuves or Rams, &c. which you may find in Helyns Cosinography.

The chief Rivers in this Southern America are 1. Oronoque, which overfloweth once a Year as doth the Nilus, 2. Amazones, the greatest and swittest in all America, 3. St. Francisco, 4. Paraguay or

Plata, S. Uraguay.

Of the Islands of AMERICA.

Of the Caribbees.

DEtween South and North America lies several Islands, the first are the Carribee or Cannibal Islands, which are several small Islands, which lie extended from the Coast of Paria to the Isle Porto Rico, the

G 3

the chief are. 1. Granada, 2. St. Vincent, 3. Dominica, 4. Barbados, 5 Antego, 6. St. Christophers, 7. Nevis, 8. Monserat, &c. The Air good, considering how they lie; the chief Commodities being Sugar, Cotten, Ginger, and Tobacco, Inhabited by several Nations.

Of the Lucaie Islands.

So called from Lucaion the Name of the biggeft; of little Note, unless for a Fountain, which is faid to Renew Youth again, and for their handsome Women, of which they are reported to have great store.

Of Porto Rico.

He Air is very Temperate and Pleasant, the Soil indifferent Fertile; the Commodities Sugar, Ginger, and Cassia.

Of Barmudas.

T is an Isle of a good Temperature, the Soil Fertile and Good, yielding Two Crops a Year, having excellent Fruits; the Commodties are Sugar, Oranges, Cochaneel, and Tobacco, and some Cotten also they have, but no great store. It is subject to the Crown of England.

Of Jamaica.

The Soil Rich and Fat, the Trees and Plants being always green and pleasant; the Air more temperate than any of the other Islas: The Commodities besides Sugar, Cotten, Indico, and I obacco, are divers and plenty; they have Cittle, Fowl, Fish and Fruits of divers forts. It is subject to the King of England.

of Cuba.

The Air is temperate and good, the Soil fertile, the Commodities are Ginger, Cassia, Mastich, Aloes, Cinamon, and Sugar, also Gold, but somewhat droffy.

Of Hispaniola.

His is much like Cuba, faving that the Gold is more pure without Dross. It is subject to the King of Spain; somewhat Hot and Unhealthful, much subject to Thunder and Lightning, by reason of its situation so near the Equinoctial.

G 4

CHAP.

CHAP. III,

Of North America in Particular.

Of New Mexico.

IT is a Province little known to the Europians; the Inhabitants being divers in Language, Manners, and Customs. It is divided into New Mexico, Arian, Quiviria, and Libola.

Of Mexico or New Spain.

Countrey enriched with innumerable Mines of Gold and Silver: The Air temperate, the Soil fertile and good, The chief Towns are 1. Mexico, 2. Guatamala, 3. Truxillo, 4. Acupulco, 5. Panaco, The Commodities besides Gold and Silver, are Copper, Iron, also: Wooll, Silk, Sugar, and divers Medicinal Drugs. They have also several other Commodities, which are too long to insert in this place. It is fully subject to the Spaniard.

Of Florida.

IT is a place of very good Temperature, the Soil very Fertile, full of Fruit Trees; the Towns well peopled; yet the Coast is very inconvenient for great Vessels, by reason of the Shallowness of the Water: Places of most Note are St. Martha and Cofa.

Of Carolina.

IT is a Countrey blest with an excellent Temperature of Air, the Soil Rich and Fertile, producing excellent Fruits, the Earth also apt to bring to Maturity Corn, all forts of Garden Herbs and Roots: The Commodities are Wines, Oyls, Silk, Cotten, Indico, Ginger, and Tobacco; plenty of Fish, Fowl, and Cattle; the chief Town is Charles Town, Governed by one at the Appointment of the Proprietors.

of Virginia.

The Air of this place is sufficiently pleasant, the Soil exceeding Fertil; it produceth all forts of Grain and Pulse, divers forts of Garden Herbs and Roots

A General Description

Roots; Silk Worms also which make good Silk; the Commodities divers, but the chief is Tobacco. The place of most Note is James Town, Governed by one Deputed by the King of England.

Of Pensilvania.

TT is a place not yet well Planted, but may be in I time, the Soil and Air being fit for the Nature of an Englishman: Granted by Patent from his late Majesty King Charles the Second, unto William Penn Esq; and his Heirs for ever, and therefore caled Pensilvania.

Of Mary-land.

HAving given you so full an account of Virginia, I need say little more, only that the general way of Commerce in both places being by interchanging one Commodity for another, and that which setteth a Price upon all other is Tobacco, there being such abundance of this Imported into England, that the King hath 60000 l. per Annum for Excise and Custom. The chief Town is Baleamore.

Of New Jersev.

For Temperature of Air and Fertility, there hath been enough faid already in Virginia and Mary-land, this place partaking of all the Properties and Advantages of them both.

Of New York.

Colony so called from his Royal Highness the Duke of York our present King. A Countrey found to produce the same Birds, Beasts, Fishes, and Fruits with New England, being Rich and Fertile. The chief Town fames Town.

of New England.

TT is a vast Track of Land, healthfully seated, I the Soil exceeding Fertile, for it yields Wheat, Rye, Pease, Beans, Barley, Gats, Indian Corn, Flax, Hemp, and all forts of English Herbs. It hath plenty of Cattle of divers forts, Fish, Fowl, and good Cyder. It excels with good Cellarage to preserve all, which is not common in Virginia; the chicf

chief Commodities are Furs, Flax, Amber, Iron, Pitch, Tar. Masts and Timber to Build Ships. Their Metropolis is *Boston*, well seated, and adorned with fair and beautiful Houses, and well peopled.

Of New Scotland, New France, and Canada.

Three Places full of Stags, Bears, Martens, Hares, Foxes, and store of Conies, Fowl, and Fish; not over Fertile. The chief places are Pre Royal in New Scooland, Quebeck in New France, and Brest in Canada, of no great Importance.

Of New Britain, New South Wales, and New North Wales.

Three Provinces much like the former (we having but little knowledge thereof) only the Soil is somewhat better. Places of most note are Fore Charles in New Britain, Port Nelfon in South Wa'es, and No Chrain North Wa'es. It was in some of these places that Hudson and others Wintered in their Voyages to the North West.

Of the Island of California.

The Air hereof is indifferently Temperate, being full of Herbage and Cattle, which be little lets than them of Europe; supposed to have some Traffick with China, but not certainly known.

Of Newfound-Land.

Is an Island famous for its Bays, Harbours, and the great store of Fish caught there; and therefore much frequented by French. Dutch, and Biscaners; some part thereof Granted by Patent to Sir George Calvert, and still possessed by his son and Heir the Lord Baltamore.

of Groenland.

Greenland contains a vast Tract of Land, not yet fully discovered, though it hath been long known to the Norwegians, who have several Colonies

nies planted therein; it hath also been touched at by feveral of our Engist Men in their Voyages to the Northwest: The Sea hath great store of Whales, also Sca Wolves, Dogs, and Calves, and White Bears which are faid to live more by Water than Land, and Feed most upon Fish: they have also Wheat, Chefnuts. Apples, and good Grass for Pasture: There are also Horses. Stags, Wolves, Foxes, Dogs, and Martles. If I should go about to relate all the Stories (which are more strange than true) that are told of the strange things in this Countrey I should need a far larger Volume than this to contain them.

Of Island.

TSland is an 150 Miles long. and little less than I an 100 broad. Its Inhabitants are subject to the King of Demnark; fo healthy are they, that they live to an hundred years of Age; nevertheless very unlearned, and little are they skilled in the Liberal Sciences, following nothing fo much as the Feeding of their Flocks and Cattle.

In this Island are Two Mountains, the Name of one is Hecla, the other Helga, which vomit and fend forth Fire in abundance: the first being so fierce, that there is no approaching it by fix Miles. and therefore the place is much indamaged thereby, that it is a great loss to the Inhabitants.

Of Hudsons Bay.

Etween Groenland and the Coast of Nova Fran-D cia, lieth a great Sea called Hudson's Streights, which after some Leagues Passage openeth into a sinc Bay, dilating it felf both toward the North, South, and West, giving great hopes of a passage that way to the East Indies. First discovered by the Two Cabots, Father and Son, upon the account of Henry the Seventh of England. Afterwards by Hudson, Forbisher, Weymouth, Button, Baffin, Smith, James, &c. and of latter times we have had a Traffick thither, which is managed by Merchants of London, called by the Name of Merchant Adventurers to Hudsons Bay: the Coast of New Britain runs along by the side of some part of this Bay, and though it has been much sought into, yet it cannot be found out yet whether there be a passage this way, or whether it is no more but an Inlet of the Sea; 'there being several places called by the Name of the first Discoverers, as the place where Hudson Wintered James Bay, Buttens Bay, Forbishers Streights, Freum Davis, Baffins Bay, &c.

Thus have I given you as full a Relation of America as the bulk of my Book will permit (being nothing (according to the best of my knowledge (but what

112. A General Description, &c.

what is the true Rate thereof at this time, hoping that if there be any mistakes you will not impute it to my carelemets, but to the Mis-information of them that have writ of any of these New Discoveries. I shall end therefore with that Advice of Helyn:

But whither goes my Bark? Return: for we Have slic'd the Capering Brine enough: See, see The South Wind'gins to gather Clouds apace; 'Iis no safe tarrying in so sierce a place. Whilst thou hast time, retire, thou wearied Bark Into safe Harbour; when the Cloud which dark The Worlds bright Eye shall be dispell'd away, And shining Phoebus make a light some Day. Tritons shrill Trump shall thee recall again, From the safe Harbour to the foaming Main, And we with all our Powers will boldly try Wish of this Unknown Worldwe can descry.

FINIS.

All forts of Mathematical Books and Instruments both for Sea and Land; Maps both great and finall of all Countreys, Maritine Charts, and Sea Plats, are fold by John Seller at his Shop on the West-side of the Royal Exchange in London, and at the Hermitage in Wapping.
